how does automation affect us our environment and our imaginations what actions should we take in response to automation beyond grand narratives and technology driven visions of the future what more can automation offer with these questions in mind the de gruyter handbook of automated futures provides a framework for thinking about and implementing automation differently it consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas it does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies instead the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems methodologically the handbook is underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people in this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation

the de gruyter handbook of artificial intelligence identity and technology studies examines the relationship of the social sciences to artificial intelligence surveying the various convergences and divergences between science and technology studies on the one hand and identity transformations on the other it provides representative coverage of all aspects of the ai revolution from employment to education to military warfare impacts on public policy and governance and the future of ethics how is ai currently transforming social economic cultural and psychological processes this handbook answers these questions by looking at recent developments in supercomputing deep learning and neural networks including such topics as ai mobile technology social robotics big data and digital research it focuses especially on mechanisms of identity by defining ai as a new context for self exploration and social relations and analyzing phenomena such as race ethnicity and gender politics in human machine interfaces

the de gruyter handbook of robots in society and culture provides a comprehensive discussion of how social robots take form function and meaning for individuals relationships cultures and societies through a path breaking integration of perspectives coming from sociology communication and media psychology cognitive neuroscience anthropology political science and science and technology studies it focuses on the critical and social meaning of present developments in social robotic technologies this book looks at artificial agents from voice based assistants to humanoid robots as their use transforms private and public contexts and gives rise to both new possibilities and new perils for human being and becoming organizations as well as social structures and institutions the handbook traces the consequences and key problems of social robotics across broad social contexts in both public and political as well as domestic and intimate spaces further it attends carefully to the implications of social robotics for various human identity groups including those based on gender ethnicity culture class ability and age deep attention to interdisciplinarity inclusivity ethics and socio cultural futures serves as the guiding inspiration behind each contribution within this handbook

winner of the 2015 american planning association new york metro chapter journalism award the state of new york is now building one of the world s longest widest and most expensive bridges the new tappan zee bridge stretching more than three miles across the hudson river approximately thirteen miles north of new york city in politics across the hudson urban planner philip plotch offers a behind the scenes look at three decades of contentious planning and politics centered around this bridge recently renamed for governor

mario m cuomo the state s governor from 1983 to 1994 he reveals valuable lessons for those trying to tackle complex public policies while also confirming our worst fears about government dysfunction drawing on his extensive experience planning megaprojects interviews with more than a hundred key figures including governors agency heads engineers civic advocates and business leaders and extraordinary access to internal government records plotch tells a compelling story of high stakes battles between powerful players in the public private and civic sectors he reveals how state officials abandoned viable options squandered hundreds of millions of dollars forfeited more than three billion dollars in federal funds and missed out on important opportunities faced with the public s unrealistic expectations no one could identify a practical solution to a vexing problem a dilemma that led three governors to study various alternatives rather than disappoint key constituencies this revised and updated edition includes a new epilogue and more photographs and continues where robert caro s the power broker left off and illuminates the power struggles involved in building new york s first major new bridge since the robert moses era plotch describes how one governor andrew cuomo shrewdly overcame the seemingly insurmountable obstacles of onerous environmental regulations vehement community opposition insufficient funding interagency battles and overly optimistic expectations

to publish a book on colonoscopy suitable for an international medical audience drawing upon the expertise and talents of many outstanding world wide clinicians is a daunting task new developments in videocolonoscope instruments procedural technique patient selection and preparation and moderate sedation and monitoring are being made and reported daily in both the medical and the lay press just as over the last several decades colonoscopy has largely supplanted the use of barium enema x ray study of the colon new developments in gastrointestinal imaging such as computerized tomographic colonography and video transmitted capsule study of the colonic lumen and new discoveries in cellular and molecular biology that may facilitate the early detection of colon cancer colon polyps and other gastrointestinal pathology threaten to relegate the role of screening colonoscopy to the side lines of medical practice this book draws on the talents of renowned physicians who convey a sense of the history the present state of the art and ongoing confronting issues and the predicted future of this discipline
