using a process based approach to personalize cbt for better success presents a unique dynamic approach to cbt shows how to implement this approach provides downloadable tools the process based approach to cognitive behavioral therapy cbt is a unique method for understanding psychological problems as complex networks of interacting processes it allows therapists to grasp the individuality complexity and dynamics of psychological disorders things that often get missed in diagnosis oriented approaches the authors both experienced researchers and practitioners of this method explore how understanding these complex networks enables therapists using cbt to focus on

the core processes responsible for a person's suffering first the reader is shown how emotional cognitive behavioral and somatic processes interact in maintaining maladaptive states and how this approach identifies the points at which therapeutic interventions can be applied to achieve maximum leverage this is followed by guidance on implementing the approach in practice including addressing diagnostic issues to create an individual process based model network for selecting the right evidence based interventions the process based approach forms a connecting foundation that combines classical cbt with third wave approaches acceptance commitment therapy schema therapy and integrates helpful recent developments in psychotherapy research such as evolutionary theories practitioners will find the downloadable tools in the appendix invaluable for their clinical practice this book is of interest to clinical psychologists psychiatrists psychotherapists mental health practitioners students and trainees

living in transit being in motion is an actual condition movement is real moreover it is essential because it concerns kinetic events we can insistently perceive that everything changes and moves all living beings undergo experiences revealing flows adaptations and becomings quotidian experiences testify to that directly or indirectly we face reality's movements all the time atoms move planets move animals move rivers move trees move technology moves economy moves the state moves and people move the ontological assertion that reality is all about beings in motion has an anthropological side that must be considered we indeed live in times highly defined by movement and change as we have said everything moves it is inevitable to perceive and face movement and change for that reason it is essential to ethically assess our human role in changing living scenarios and dynamic beings

in the realm of universities the future is directly linked to the ability to connect local realities with the knowledge generated by researchers from other parts of the world the experiences developed by the lasallian laboratory for colombian habitat construction lab lahc and teams of faculty and students from the technische hochschule ostwestfalen lippe in germany are presented as precedents these experiences have allowed this research to analyse diagnose and propose alternatives for rural habitat and nature tourism the goal is to create solutions promoting well being and enjoying environments that protect biodiversity through exercises and dialogues we have recognized our realities and those of other contexts expanded discussions set new challenges and strengthened bonds of friendship these findings are presented reflectively and expositively in this book
