inverse problems of spectral analysis consist in recovering operators from their spectral characteristics such problems often  
 appear in mathematics mechanics physics electronics geophysics meteorology and other branches of natural science this  
 monograph deals with inverse problems of spectral analysis for ordinary differential equations and aims to present the main  
 results on inverse spectral problems using the so called method of spectral mappings which is one of the main tools in inverse  
 spectral theory the book consists of three chapters and opens with the method of spectral mappings presented in the simplest  
 version for the sturm liouville operator the second chapter deals with the inverse problem of recovering higher order differential  
 operators of the form on the half line and on a finite interval in this chapter the author introduces the so called weyl matrix which  
 is a generalization of the classical weyl function for the selfadjoint second order differential operator the last chapter contains a

study on inverse spectral problems for differential equations with nonlinear dependence on the spectral parameter this monograph will be of value and interest to specialists in the field of inverse problems for differential equations
