disputes in the energy and natural resources sector are at the heart of international arbitration

with more arbitrations arising in the international energy sector than in any other sector it is not surprising that the highest valued awards in the history of arbitration come from energy related arbitrations energy disputes often involve complex and controversial issues relating to security sovereignty and public welfare international arbitration in the energy sector puts international energy disputes into a global context providing broad coverage of different forms and systems of dispute resolution across both renewable and non renewable sectors with contributions from leading arbitrators academics and industry experts from across the globe the twenty chapters in the book enable readers to compare the approaches to and learnings from energy arbitrations across various legal systems and geographic regions after outlining the international energy arbitration legal framework in part i the text delves into a detailed analysis of the problems which regularly arise in practice these include among other things commercial disputes in part ii e g over the upstream oil sector and long term gas supply contracts investor state disputes in part iii e g under the energy charter treaty and public international law disputes in part iv e g concerning international boundaries and the distribution of natural resources alongside recent developments in the international energy sector attention is given to climate and sustainable development disputes which raise important questions about enforcing sustainability objectives on individuals corporations and states backed by analyses of arbitral awards national court and international tribunal decisions treaties and other international legal instruments as well as current events and news in the energy industry this text offers a unique contribution to international energy literature and provides insightful commentary on the prevalent issues in the field it is essential reading for any practitioner or researcher in the energy and natural resources sector

in the last decade there has been a growing interest in the study of the interactions between the

heart and the brain especially in the field of cerebral ischemia the interactions between cardiovascular and cerebrovascular diseases are of relevance not only for research investigation but also for clinical implications in the daily clinical practice i e a wealth of information has been gathered particularly on three topics cardiovascular consequences of cerebral injuries cardioembolic stroke and association of carotid and coronary artery disease the available information however is still sparse and fragmentary mainly because of the lack of communication between neurologists and cardiologists with the aim of improving communication between several disciplines and technologies we started to organize since 1987 in bologna italy an international symposium on heart brain interactions to be held every 3 years our intention was to gather prominent clinicians and researchers from outstanding cardiologic and neuro logic institutions actively involved in the study of heart brain interactions the ambitious goal has been to fit different pieces of information like in a puzzle this book originates from the contributions presented at the 2nd symposium which was held in bologna on november 30 december 1 1990 the book is subdivided into three sections i cardiovascular consequences of cerebral damage ii cardiogenic cerebral ischemia iii cerebrovascular and coronary artery disease

the seaside has always held a special position in british history as a place of rest relaxation and recuperation over the last 200 years many have made their way to the coast attracted by the long sunshine hours the clean ozone charged air and the opportunities for bathing in and even

drinking sea water although the early health resort ideal began to give way to more pleasure orientated themes in the nineteenth century the seaside holiday was still regarded by many as a wholesome and invigorating break from inland urban life well into the twentieth century yet with ever increasing numbers of visitors and rising levels of coastal pollution this was by no means a forgone conclusion the seaside health and the environment in england and wales since 1800 explores the ways in which english seaside resorts continually reinvented themselves to take account of contemporary trends in popular leisure and maintain their hold on the public s imagination particular account is paid to the interwar years when new obsessions with outdoor activities such as sunbathing and tanning were purposefully adopted by the industry to define the modern image of the resort holiday for these and other reasons the seaside holiday reached new peaks of popularity in the 1930s and 1950s yet this very success placed enormous pressures on the environmental amenities that people came to enjoy as this work shows environmental stresses were manifold particularly pollution of the resorts prime assets their beaches as such serious questions are raised concerning why it took such a long time for a determined effort to be made to reverse beach pollution and the lessons to be learned regarding the impact of negative images of the coast as a zone of danger and infection
