philosophy has sometimes been described as the discipline in which you can never be wrong as the reserve of absentminded professors aloof academics and purveyors of obscure ideas or interesting opinions quite the contrary philosophy answers the hard questions does everything happen by chance is there anything more than matter in the universe are humans in the same class as animals is there a god can we know the correct answer to these questions the answers to these questions matter we are all philosophers even though we are not aware of the fact we each have a set of ultimate priorities and principles answers to these questions a big picture that determines our everyday thoughts decisions and actions in this book brian cronin uses the ideas of bernard lonergan s insight a study of human understanding to argue methodically towards a correct critical comprehensive worldview an answer to those big questions which is the precise task of first philosophy this book is an accessible and readable presentation of lonergan s metaphysics a somewhat neglected topic science and philosophy are complementary scientists answer the concrete detailed questions about everything around us the parts philosophy integrates all these into a correct worldview of the whole of everything

exciting activities develop pupils thinking skills with clear lesson objectives so pupils know what and how they are going to learn assessment pages with mark schemes based on the 8 level scale help pupils understand exactly what is required at each level regular peer and self

assessment features support assessment for learning

luciano floridi presents an innovative approach to philosophy conceived as conceptual design he explores how we make transform refine and improve the objects of our knowledge his starting point is that reality provides the data to be understood as constraining affordances and we transform them into information like semantic engines such transformation or repurposing is not equivalent to portraying or picturing or photographing or photocopying anything it is more like cooking the dish does not represent the ingredients it uses them to make something else out of them yet the reality of the dish and its properties hugely depend on the reality and the properties of the ingredients models are not representations understood as pictures but interpretations understood as data elaborations of systems thus luciano floridi articulates and defends the thesis that knowledge is design and philosophy is the ultimate form of conceptual design although entirely independent of floridi s previous books the philosophy of information oup 2011 and the ethics of information oup 2013 the logic of information both complements the existing volumes and presents new work on the foundations of the philosophy of information

this volume approaches the word of faith as a worldview and analyses the movement through n t wright s model for worldview analysis in order to provide necessary nuance and complexity to scholarly interpretations of the word of faith the reader receives insights into the movement s narrative semiotic practical and propositional dimensions which cumulatively offer a multifaceted understanding of how the word of faith interprets reality and engages with the world the analysis shows that there is a narrative core to word of faith beliefs in the form of a unique theological story with focus set on the present restoration of eden s authority and blessings this study demonstrates how the word of faith operates as a distinct worldview that parses the world through the lens of faith s causative power to affect a direct correspondence between present reality and eden s perfection the findings advance a critical and therapeutic

approach that acknowledges how the worldview both strengthens and subverts pentecostalism

a collection of fifteen essays addressing the basic intellectual challenges to the contemporary christian church professor torrance deals with such topics as the centrality of christology in scientific dogmatics the reformed and roman catholic doctrines of grace theological education the relation of theological statements to scientific methodology the contemporary significance of some past theological giants and the nature and significance of the holy spirit and of the church
