although it is widely recognized that environmental factors such as smoking diet exercise and socioeconomic status affect the risk of cardiovascular disease recent work showing the effects of other environmental factors provides a more complete assessment of the situation this view has emerged from three developments firstly there has been a sudden explosion in the prevalence of diabetes and obesity which indicates a strong environmental component secondly there is an accumulation of evidence suggesting that most cases of these

diseases could be prevented by healthy lifestyle choices finally studies have shown that exposure to environmental pollutants has a significant effect on heart disease risk this book is the first to provide a comprehensive account of the effects of pollutants on heart disease and to integrate this area of research within the overall theme of environmental cardiology the introductory chapter outlines the effects of different aspects of the environment on heart disease and provides a context for the discussion that follows subsequent chapters give an overview of the effects of particulate matter and discuss the epidemiological studies supporting the link the book then goes on to cover the effects of pollution on different aspects of cardiovascular disease hypertension stroke heart failure ischemic heart disease and atherogenesis because of a close association between diabetes and heart disease a discussion of the effects of particulate matter on diabetes is also included later chapters discuss the effects of individual pollutants such as vehicular emissions metals and aldehydes a review on manufactured nanoparticles is incorporated because these particles represent an important new threat to cardiovascular health the understanding that emerges from this monograph suggests that we must be more alert to the effects of the environment and develop strategies that target not only the diseased individual but also the unhealthy disease causing environment it is essential reading for cardiologists epidemiologists urban planners and pollution control specialists

popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better

share in the trials and tribulations of turning a bare frame and wrecked miata into a racetrack demon and learn how to build a sports car of your own along the way this book provides specific answers to common questions and covers the entire building process including the post build fine tuning of the car that is necessary to extract the car s full performance and fun potential

cars are more than just a means of transportation they are a reflection of our lives our experiences and our personal growth each vehicle we own becomes a chapter in our life story intertwined with memories adventures and the people we share those moments with in this book my car journey a lifetime of automotive adventures i invite you to join me on a nostalgic journey through my life as told through the cars i have owned from the early days of delivering newspapers on my yamaha riva scooter to the custom built classics crafted by my brother in law each vehicle represents a unique phase and holds a special place in my heart as you turn the pages you ll discover the importance of these cars beyond their make and model you ll see how they served as trusty companions during my teenage years provided a sense of freedom and independence as i entered adulthood and became an integral part of my family life as the years passed
