ebony is the flagship magazine of johnson publishing founded in 1945 by john h johnson it still maintains the highest global circulation of any african american focused magazine

from the new york times bestselling author jami attenbergh comes a dazzling novel of family following a troubled mother and her two daughters over forty years through a swiftly changing american landscape as they seek lives they can fully claim as their own the women of the cohen family are in crisis after the death of their patriarch rudy the glue that held them all together everyone's lives soon take a dramatic turn shelly the younger of the two cohen sisters runs off to the west coast to immerse herself in the emerging and lucrative world of technology her sister nancy gets married at the age of twenty one to a traveling salesman with a shadowy lifestyle while their mother frieda hurls herself into a boozy troubled existence in miami trying to forget the past even as it haunts her but each woman must learn in her own way that running from the past can't save you and they must make life altering decisions about what they want their family to be and what they need for themselves to move forward beginning in the 1970s and spanning forty years a reason to see you again takes the reader on a kaleidoscopic journey through motherhood the american workforce the tech industry the self help movement inherited trauma the ever evolving ways we communicate with one another and the many unexpected forms that love can take

this book offers a critique of two major themes of the modern reform movement in mathematics education problem solving and the applications of mathematics to the real world in examining the educational fallacy inherent in the impulse to move unflinchingly from problem to problem solving stephen i brown demonstrates the potential of mathematical reflection to reveal aspects of self and society that have been suppressed in curriculum he then argues that in seeking connections between mathematics and the real world we have tended to reduce their relationship to one of modeling furthermore in constructing what is real in an overly concrete way we have lost sight of the wonder of what is real in both mathematics and the world brown explores alternative text formats including that of the novel and the talmud as vehicles to rejuvenate the educational potential of problems and of real world connections

about teaching mathematics quickly became a much sought after resource upon its

publication in 1992 with more than 200 000 copies in print it presents information necessary for teachers to teach math through problem solving to understand the math they are responsible for teaching and to understand how children best learn math now marilyn burns has updated and expanded this important resource including an entirely new fifty page section mathematical discussion here she addresses many of the problems and activities in the text presenting the underlying mathematics for each as well as solutions another new section extending multiplication and division addresses how to help students deal with large number computation burns has also made numerous changes to the section on fractions and has clarified and reorganized points throughout the book to make her ideas as clear and accessible as possible about teaching mathematics now gives teachers an even better guide for making appropriate and effective instructional decisions it is an essential resource for all teachers of k 8 mathematics
