Bachelor thesis from the year 2016 in the subject Business Economics Business Management Corporate Governance grade 1.0 University of Linz International Management Course Current Issues in International Management Language English Abstract This thesis will provide a clear understanding of how and why company culture is such an important factor in M&A. First of all, mergers, acquisitions, and company culture will be defined. Then different types of company cultures are analysed regarding their mutual compatibility. This is followed by an explanation of how cultural integration can take place and how managers can facilitate it. Finally, important findings are summarized and discussed as globalization progresses so does the internationalization of companies. In the course of this development over the last 30 years, the forming of mergers and acquisitions has become very popular. One of the greatest challenges in a merger or an acquisition is aligning the company culture of the merging partners. Before, during, and after the merger, company culture or the lack of an integrated company culture can crucially influence the success or failure of a

merger or acquisition however in spite of the fact that there are a lot of ways to facilitate cultural integration it is something that is often neglected in the planning phase which makes it all the more difficult to accomplish successfully further along in the process
