air assault is a combat insertion unit using helicopters to
transport and insert soldiers into battle provide medical evacuation
provide close air support provide resupply operations it is usually
a company or bat talion sized element the term air assault derives
from two types of operations known as air mobility and vertical
envelopment air mobility operations were de veloped by the german
army during wwii in the 1930 s the us army soon adopted this method
of offensive operations in 1941 using wooden gliders the glider was
assisted into the air by being towed by a larger aircraft and then
released the pilot had to navigate the large glider loaded with a
team of infantry soldiers to the landing zone behind enemy lines at
night and attempt to land safely once the pilot landed the glider he
would join the mission as another infantry soldier with the team
that he flew in although the gliders and techniques used were
advanced for that time period they did pose some disadvantages once

the aircraft was landed safely that team of soldiers were cut off from allied troops pilots had to be cross trained with infantry tactics so he could operate as both roles the air mobility glider was abandoned after wwii after the invention of the helicopter
