this volume presents students and scholars with a comprehensive overview of the fascinating world of the occult it explores the history of western occultism from ancient and medieval sources via the renaissance right

up to the nineteenth and twentieth centuries and contemporary occultism written by a distinguished team of contributors the essays consider key figures beliefs and practices as well as popular culture

each of the figures examined in this study john dee john donne sir kenelm digby henry and thomas vaughan and jane lead is concerned with the ways in which god can be approached or experienced michael martin analyzes the ways in which the encounter with god is figured among these early modern writers who inhabit the shared cultural space of poets and preachers mystics and scientists the three main themes that inform this study are cura animarum the care of souls and the diminished role of spiritual direction in post reformation religious life the rise of scientific rationality and the struggle against the disappearance of the holy arising from the methods and commitments of phenomenology the primary mode of inquiry of this study resides in contemplation not in a religious sense but in the realm of perception attendance and acceptance martin portrays figures such as dee digby and thomas vaughan not as the eccentrics they are often depicted to have been but rather as participating in a religious mainstream that had been radically altered by the disappearance of any kind of mandatory or regular spiritual direction a problem which was further complicated and exacerbated by the rise of science thus this study contributes to a reconfiguration of our notion of what religious orthodoxy really meant during the period and calls into question our own assumptions about what is or was orthodox and heterodox

by the end of the nineteenth century victorians were seeking rational explanations for the world in which they lived the radical ideas of charles darwin had shaken traditional religious beliefs sigmund freud was developing his innovative models of the conscious and unconscious mind and anthropologist james george frazer was subjecting magic myth and ritual to systematic inquiry why then in this quintessentially modern moment did late victorian and edwardian men and women become absorbed by metaphysical quests heterodox spiritual encounters and occult experimentation in answering this question for the first time the place of enchantment breaks new ground in its consideration of the role of occultism in british culture prior to world war i rescuing occultism from its status as an irrational indulgence and situating it at the center of british intellectual life owen argues that an involvement with the occult was a leitmotif of the intellectual avant garde carefully placing a serious engagement with esotericism squarely alongside revolutionary understandings of rationality and consciousness owen demonstrates how a newly psychologized magic operated in conjunction with the developing patterns of modern life she details such fascinating examples of occult practice as the sex magic of aleister crowley the pharmacological experimentation of w b yeats and complex forms of astral clairvoyance as taught in secret and hierarchical magical societies like the hermetic order of the golden dawn through a remarkable blend of theoretical discussion and intellectual history owen has produced a work that moves far beyond a consideration of occultists and their world bearing directly on our understanding of modernity her conclusions will force us to rethink the place of the irrational in modern culture an intelligent well argued and richly detailed work of cultural history that offers a substantial contribution to our understanding of britain
