perceptual drawing in which one renders the physical world as it appears to an observer is  
the focus of this new text for the introductory drawing course with an emphasis on  
progressive skill development drawing from observation offers a balanced mix of hands on  
technique and perceptual theory while making a compelling argument for the long term  
value of studying perception based drawing

by applying philosophical and historical perspectives to drawing instruction this volume  
demonstrates how diverse teaching methods contribute to cognitive and holistic development  
applicable within and beyond the visual arts offering a new perspective on the art and  
science of drawing this text reveals the often unrecognized benefits that drawing can have  
on the human mind and thus argues for the importance of drawing instruction despite and  
even due to contemporary digitalization given the predominance of visual information and  
digital media visual thinking in and through drawing may be an essential skill for the future  
as such the book counters recent declines in drawing instruction to propose five paradigms  
for teaching drawing as design as seeing as experience and experiment as expression and as  
a visual language with exemplary curricula for pre k12 art and general education pre  
professional programs across the visual arts and continuing education with the aid of

instructional examples this volume dispels the misconception of drawing as a talent reserved for the artistically gifted and posits it as a teachable skill that can be learned by all this text will be of primary interest to researchers scholars and doctoral students with interests in drawing theory and practice cognition in the arts positive psychology creativity theory as well as the philosophy and history of arts education aligning with contemporary trends such as design thinking steam and graphicacy the text will also have appeal to visual arts educators at all levels and other educators involved in arts integration
