the central question of this pioneer work on the responsibility of non state actors nsas and the consequences thereof is to whom  
 are such actors in particular armed opposition groups and business corporations accountable for their actions in armed conflict and  
 in peace times does responsibility in international law apply to these nsas qua groups while much has been written about nsas  
 rights and participation in the global theatre as well as the responsibility of the state and international organisations for wrongful  
 acts by nsas scant attention has been paid to questions of nsa organizational responsibility in spite of their potential to wreak  
 international havoc this volume offers innovative insights into this unexplored territory by analyzing responsibility questions from both  
 theoretical and empirical perspectives

first published in 2011 this special issue of the interpreter and translator trainer provides a forum for reflection on questions of  
 ethics in the context of translator and interpreter education covering a wide range of training contexts and types of translation and

interpreting contributors call for a radically altered view of the relationship between ethics and the translating and interpreting profession a relationship in which ethical decisions can rarely if ever be made a priori but must be understood and taught as an integral and challenging element of one's work

the discipline of epidemiology provides a methodology for perceiving the world and relating to the communities whose health and disease patterns need to be understood forensic epidemiology extends our understanding to community's injuries and those alleged to be responsible this much needed resource focuses on the use of the epidemiology in the legal context using case studies to illustrate the issues raised this work includes discussion of epidemiology in the courtroom epidemiology legislation and rulemaking law epidemiology and community organization and advocacy epidemiology law and social context this text challenges the boundaries about what epidemiology is and how it is to be used to make a contribution to the groups it studies in turn a more complete understanding of the populations diseases and the systems that underlie and shape the research is reached this book will be of value to the student studying in public health environmental health and medical programs law students as well as professional researchers

this book analyses the common law's approach to retroactivity the central claim is that when a court considers whether to develop or change a common law rule the retroactive effect of doing so should explicitly be considered and informed by the common law's approach to statutory construction presumptively be resisted as a platform for this claim a definition of retroactivity is established and a review of the history of retroactivity in the common law is provided it is then argued that certainty particularly in the form of an ability to rely on the law and a conception of negative liberty constitute rationales for a general presumption against retroactivity at a level of abstraction applicable both to the construction of statutes and to developing or changing common law rules the presumption against retroactivity in the construction of statutes is analysed and one conclusion reached is that the presumption is a principle of the common law independent of legislative intent across private public and criminal law the retroactive effect of judicial decisions that develop or change common law rules is then considered in detail prospective overruling is examined as a potential means to control the retroactive effect of some judicial decisions but it is argued that prospective overruling should be regarded as constitutionally impermissible the book is primarily concerned with english and australian law although cases from other common law

jurisdictions particularly canada and new zealand are also discussed the conclusion is that in statutory construction and the adjudication of common law rules there should be a consistently strong presumption against retroactivity motivated by the common law's concern for certainty and liberty and defeasible only to strong reasons ben juratowitch not only gives an account of the operation of the presumption but also teases out the policies which underlie the different rules this is particularly welcome lawyers and judges often seem less than sure footed when confronted by questions in this field by giving us an insight into the policies the author provides a basis for more satisfactory decision making in the future the author not only discusses the recent cases but examines the question in the light of authority in other commonwealth jurisdictions and with due regard to the more theoretical literature this is a valuable contribution to what is an important current debate in the law happily ben juratowitch has succeeded in making his study not only useful but interesting and enjoyable from the foreword by lord rodger of earlsferry

nicholls montgomery and knowles on the law of extradition and mutual assistance provides a comprehensive and analytical treatment of the laws covering the extradition and mutual assistance agreements as well as international mutual assistance provides extensive treatment of both extradition and mutual assistance in one text
