students are often overwhelmed by the amount of information presented in the introductory financial accounting course fundamental financial and

managerial accounting concepts gives students the big picture by focusing on fundamental concepts in a logical sequence the authors intentionally limit the scope of the material to help students build a solid foundation of the most important concepts as a result students are able to fully comprehend the material rather than memorize seemingly unrelated terms and topics in the financial portion the horizontal financial statements model enables students to understand how any given business event affects the financial statements this highly praised feature allows students to visualize the simultaneous impact of business events on all of the key financial statements the income statement the balance sheet and the statement of cash flows the mechanics of accounting coverage debits and credits is delayed until chapter 3 allows flexibility in the amount of emphasis they want to place on this topic publisher's website

this text focuses on the development of decision making skills the decision making emphasis is evident from a review of the table of contents you will notice that topics related to decision making are placed first while procedural topics like manufacturing cost flow job order and process costing are placed at the end of our text in addition we have made an effort to reduce the coverage of recording procedures accordingly the text is a natural fit for schools that have decided to take a user oriented approach for their introductory financial accounting course the text places an unusually heavy emphasis on service and merchandising companies for example the budgeting chapter uses a merchandising business while most traditional texts use a manufacturing company using a merchandising company is not only more relevant but also simplifies the learning environment thereby making it easier for students to focus on budgeting concepts rather than procedural details

this edition focuses on concepts that are isolated in a logical sequence it explains how accountants manipulate financial statements discusses the three common features of criminal and ethical misconduct including opportunity pressure and rationalization and much more

written for the cost accounting course at the third level this book should appeal to professors who see cost accounting as a cost information process to make more informed managerial decisions this book features extended examples of cost techniques used by real companies and real world examples which demonstrate a balance among manufacturing companies service firms and non profit firms

fundamental managerial accounting concepts 4e by edmonds edmonds tsay olds focuses on concepts that are isolated and introduced in a logical

sequence the authors intentionally limit the scope of the material to help students build a solid foundation of the most important concepts in managerial accounting fundamental managerial accounting concepts 4e is organized in a distinctive way particularly in the first six objective is to establish a coherent integrative framework that enables students to build knowledge in stepwise fashion the authors goal is for students to understand the underlying principles of accounting not just memorize content
