both in science and in practical affairs we reason by combining facts only inconclusively supported by evidence building on an abstract understanding of this process of combination this book constructs a new theory of epistemic probability the theory draws on the work of a p Dempster but diverges from Dempster's viewpoint by identifying his lower probabilities as epistemic probabilities and taking his rule for combining upper and lower probabilities as fundamental the book opens with a critique of the well known Bayesian theory of epistemic probability it then proceeds to develop an alternative to the additive set functions and the rule of conditioning of the Bayesian theory set functions that need only be what Choquet called monotone of order of infinity and Dempster's rule for combining such set functions this rule together with the idea of weights of evidence leads to both an extensive new theory and a better understanding of the Bayesian theory the book concludes with a brief treatment of statistical inference and a discussion of the limitations of epistemic probability appendices contain mathematical proofs which are relatively elementary and seldom depend on mathematics more advanced than the binomial theorem

what is the optimal size and composition of rural financial cooperatives rfc's with

this broad question in mind we characterize alternative formation of rfcs and their implications in improving the access of rural households to financial services including savings credit and insurance services we find that some features of rfcs have varying implications for delivering various financial services the size of rfcs is found to have a nonlinear relationship with the various financial services rfcs provide we also show that compositional heterogeneity among members including diversity in wealth is associated with higher access to credit services while this has little implication on households savings behavior similarly social cohesion among members is strongly associated with higher access to financial services these empirical descriptions suggest that the optimal size and composition of rfcs may vary across the domains of financial services they are designed to facilitate this evidence provides suggestive insights on how to ensure financial inclusion among smallholders a pressing agenda and priority of policy makers in developing countries including ethiopia the results also provide some insights into rural microfinance operations which are striving to satisfy members demand for financial services
