What makes certain leaders so effective in rallying their troops? In his 2014 book *Leaders Eat Last*, Simon Sinek examines the role that our biology plays in the division of leaders and followers and highlights the qualities that make up a good leader. This audiobook summary contains clips that showcase some of the book's most important points: learn about the results of bad leadership, how our modern addictions can keep us from building real foundations with other people, how to fulfill your vision for the future by putting others before yourself, and more. Note: this audiobook summary was produced by Blinkist. We are pleased to host this content in our library.

The deluxe edition of *Leaders Eat Last* now with an expanded chapter and appendix on leading millennials includes over 30 minutes of exclusive video and 30 minutes of audio of Simon Sinek, the acclaimed bestselling author of *Start With Why* and *Together Is Better*. It delves deeper into the book's themes and shares additional examples and insights. Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy idealized notion; today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation, and failure. Why the answer became clear during a conversation with a Marine Corps general: officers eat last. He said Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: great leaders sacrifice their own comfort, even their own survival, for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a circle of safety that separates the security inside the team from the challenges outside. Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking.

imagine a workplace where people wake up excited to contribute feel trusted and valued throughout the day and return home fulfilled this vision isn't unrealistic it's the reality of organizations led by individuals who understand the principles at the heart of leaders eat last in his work with companies and institutions worldwide simon sinek uncovered a striking truth some teams develop bonds so strong that members would risk their lives for one another while others collapse under infighting despite abundant incentives the difference he realized comes down to leadership a marine corps general explained it best officers eat last in the military the most junior marines are served first while senior leaders wait their turn this act symbolic in the chow hall and vital on the battlefield reveals a timeless principle true leaders sacrifice their own comfort and safety for the well being of those they serve leaders eat last shows how this philosophy applies far beyond the military too many workplaces are poisoned by cynicism fear and self interest but the best organizations thrive because their leaders build what sinek calls a circle of safety an environment where trust and cooperation flourish allowing teams to focus on challenges from the outside rather than threats from within through compelling real world stories from the armed forces global corporations government and even investment banking leaders eat last demonstrates how leaders who put others first unlock extraordinary loyalty creativity and results it's a guide to transforming workplaces and lives by redefining what it means to lead
