this book defines a logical system called the protocol theoretic logic of epistemic norms plen it develops plen into a formal framework for representing and reasoning about epistemic norms and it shows that plen is theoretically interesting and useful with regard to the aims of such a framework in order to motivate the project the author defends an account of epistemic norms called epistemic proceduralism the core of this view is the idea that in virtue of their indispensable regulative role in cognitive life epistemic norms are closely intertwined with procedural rules that restrict epistemic actions procedures and processes the resulting organizing principle of the book is that epistemic norms are protocols for epistemic planning and control the core of the book is developing plen which is essentially a novel variant of propositional dynamic logic pdl distinguished by more or less elaborate revisions of pdl 's syntax and semantics the syntax encodes the procedural content of epistemic norms by means of the well known protocol or program constructions of dynamic and epistemic logics it then provides a novel language of operators on protocols including a range of unique protocol equivalence relations syntactic operations on protocols and various procedural relations among protocols in addition to the standard dynamic modal operators of pdl the semantics of the system then interprets protocol expressions and expressions embedding protocols over a class of directed multigraph like structures rather than the standard labeled transition systems or modal frames the intent of the system is to better represent epistemic dynamics build a logic of protocols atop it and then show that the resulting logic of protocols is useful as a logical framework for epistemic norms the resulting theory of epistemic norms centers on notions of norm equivalence derived from theories of process equivalence familiar from the study of dynamic and modal logics the canonical account of protocol equivalence in plen turns out to possess a number of interesting formal features including satisfaction of important conditions on hyperintensional equivalence a matter of recently recognized importance in the logic of norms generally to show that the system is interesting and useful as a framework for representing and reasoning about epistemic norms the author applies the logical system to the analysis of epistemic deontic operators and partly on the basis of this establishes representation theorems linking protocols to the action guiding content of epistemic norms the protocol theoretic logic of epistemic norms is then shown to almost immediately validate the main principles of epistemic proceduralism

the most comprehensive treatment of ffts to date van loan captures the interplay between mathematics and the design of effective numerical algorithms a critical connection as more advanced machines become available a stylized matlab notation which is familiar to those engaged in high performance computing is used the fast fourier transform fft family of algorithms has revolutionized many areas of scientific computation the fft is one of the most widely used algorithms in science and engineering with applications in almost every discipline this volume is essential for professionals interested in linear algebra as well as those working with numerical methods the fft is also a great vehicle for teaching key aspects of scientific computing

islamic banking is growing rapidly and its potential impact on global financial stability cannot be underestimated international standards for resolving banks have evolved after the global financial crisis culminating in the financial stability board's fsb key attributes of effective resolution regimes for financial institutions this paper examines the applicability of the key attributes to the resolution of islamic banks it concludes that a number of issues would need to be addressed owing to islamic banks unique governance structures and balance sheets it recommends international guidance for the design of robust shari'ah compliant resolution frameworks for jurisdictions with islamic banks
