both europe and the us have now dampened the shrillness of the invective hurled against each other over the last years but the underlying differences have not been resolved the two sides drift apart in their views on what internal politics should achieve as well as in their vision of the global order they would like to see established the economies of both europe and the us are highly developed and densely interwoven their societies are post industrial many social and economic trends converge similar too are the challenges to maintain security against threats emanating from other parts of the world divergences thus do not originate from conflicting material interests they arise from different perceptions of the nature and of threats from the outside world from how the two societies wish to define themselves through their internal and external policies the search for a distinct european or american identity fuels this discord therefore appeals to common merely material interests will not obliterate it the contributions to this book come from altogether twelve authors each of them addressing the issues from the perspective of his or her own discipline the book aims to reach not just academia but also beyond to those that are involved in actual international decision making

cognitive science is the project of understanding the mind by modeling its workings its development is one of the most remarkable and fascinating intellectual achievements of the modern era mind as machine is a masterful history of cognitive science told by one of its most eminent practitioners

popular science writer philip ball explores a range of sciences to map our answers to a huge

philosophically rich question how do we even begin to think about minds that are not human sciences from zoology to astrobiology computer science to neuroscience are seeking to understand minds in their own distinct disciplinary realms taking a uniquely broad view of minds and where to find them including in plants aliens and god philip ball pulls the pieces together to explore what sorts of minds we might expect to find in the universe in so doing he offers for the first time a unified way of thinking about what minds are and what they can do by locating them in what he calls the space of possible minds by identifying and mapping out properties of mind without prioritizing the human ball sheds new light on a host of fascinating questions what moral rights should we afford animals and can we understand their thoughts should we worry that ai is going to take over society if there are intelligent aliens out there how could we communicate with them should we understanding the space of possible minds also reveals ways of making advances in understanding some of the most challenging questions in contemporary science what is thought what is consciousness and what if anything is free will informed by conversations with leading researchers ball s brilliant survey of current views about the nature and existence of minds is more mind expanding than we could imagine in this fascinating panorama of other minds we come to better know our own

mentality and machines was first published in 1985 minnesota archive editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original university of minnesota press editions mentality and machines with a new preface and an extended postscript is a general essay on the philosophy of mind oriented to philosophical and psychological questions about real as well as imagined robots and machines the second edition retains all of the essays from the original book including gunderson s influential critique the imitation game of a m turing s treatment of the question can machines think and his controversial distinction between program receptive and program resistant aspects of the mind this edition s postscript includes further reflections on these themes and others and relates them to recent writings of other philosophers and computer scientists

ray kurzweil is the best person i know at predicting the future of artificial intelligence bill gates in how to create a mind ray kurzweil offers a provocative exploration of the most important project in human machine civilisation reverse engineering the brain to understand precisely how it works and using that knowledge to create even more intelligent machines kurzweil explores how the brain functions how the mind emerges from the brain and the implications of vastly increasing the powers of our intelligence in addressing the world s problems he thoughtfully examines emotional and moral intelligence and the origins of consciousness and

envision the radical arguably inevitable future of our merging with the intelligent technology we are creating

original essays written by philosophers and scientists and dealing with philosophical questions arising from work in evolutionary biology and artificial intelligence

one of the pioneers of neural computers that borrow heavily on the brain's design new scientist this volume helps unravel the debate on replicating human consciousness
