comparative vertebrate neuroanatomy evolution and adaptation second edition ann b butler and  
 william hodos the second edition of this landmark text presents a broad survey of comparative  
 vertebrate neuroanatomy at the introductory level representing a unique contribution to the field of  
 evolutionary neurobiology it has been extensively revised and updated with substantially improved  
 figures and diagrams that are used generously throughout the text through analysis of the  
 variation in brain structure and function between major groups of vertebrates readers can gain  
 insight into the evolutionary history of the nervous system the text is divided into three sections  
 introduction to evolution and variation including a survey of cell structure embryological

development and anatomical organization of the central nervous system phylogeny and diversity of brain structures and an overview of various theories of brain evolution systematic comprehensive survey of comparative neuroanatomy across all major groups of vertebrates overview of vertebrate brain evolution which integrates the complete text highlights diversity and common themes broadens perspective by a comparison with brain structure and evolution of invertebrate brains and considers recent data and theories of the evolutionary origin of the brain in the earliest vertebrates including a recently proposed model of the origin of the brain in the earliest vertebrates that has received strong support from newly discovered fossil evidence ample material drawn from the latest research has been integrated into the text and highlighted in special feature boxes including recent views on homology cranial nerve organization and evolution the relatively large and elaborate brains of birds in correlation with their complex cognitive abilities and the current debate on forebrain evolution across reptiles birds and mammals comparative vertebrate neuroanatomy is geared to upper level undergraduate and graduate students in neuroanatomy but anyone interested in the anatomy of the nervous system and how it corresponds to the way that animals function in the world will find this text fascinating

drawing on computistical and astronomical sources from late antiquity to the renaissance this book demonstrates how pre modern christian attempts to determine the principal dates of the life of jesus played an essential role in the development of historical chronology

the conflict between creationists and evolutionists has raged ever since the publication of on the origin of species in 1859 and yet even as generations of americans have fought and re fought the same battles the contours of the debate have in recent years shifted dramatically tracking the dizzying rhetorical heights and opportunistic political lows of this controversy larry witham travels to america s churches schools universities museums and government agencies to present creationists and evolutionists in their own unfiltered voices we meet leading creationists and proponents of intelligent design such as michael behe evolutionists such as richard dawkins and

theistic scientists who describe how they reconcile god and nature today biblical literalism is tempered by the intelligent design movement which finds evidence of god s presence in nature s patterns the once dominant young earth school has been replaced by a creationism that conscripts the language of science to advance the creationist cause meanwhile evolutionary scientists hesitate to point out gaps in their theories for fear that such self scrutiny could serve as fodder for anti evolution propaganda in an age marked both by a rising religious tide and daily scientific breakthroughs where darwin meets the bible provides the standard account of this lasting conflict
