an analysis of japan s industrialization in an international historical and economic perspective from the time that her ports were first opened to foreign trade first published in 1988 this title is part of the bloomsbury academic collections series

this text provides a detailed examination of the industrial development of japan since th meiji restoration 1868 and shows the extent to which japan s own urbanization played a crucial role in its overall economic development

in this book peer vries is the first scholar to provide an extensive test of the claim that industrialization in east asia in particular in japan between the meiji restoration and world war two would have been much more labour intensive than industrialization in the west he does this by systematically comparing the role and importance of labour and capital in japan and in a number of western countries at a similar stage of their industrial development he uses macro economic data as well as specific observations by people at the time it turns out that there is no reason to distinguish a specific labour intensive japanese route of industrialization his comparative analysis provides us with a better understanding of the logic of industrialization in both west and east

native sources is a collection of seminal essays on the demographic economic and social history of tokugawa and modern japan by one of the most eminent historians of japan in this country gathered together for the first time and made accessible to students and scholars professor smith s essays are indispensable reading for anyone interested in japan s remarkable history

japan was the first major non western nation to take on board the western technological and organizational advances of the century after the fist industrial revolution it subsequently proved fully able to exploit and contribute to the broad sustained technological advances that began in the twentieth century as science became harnessed to technology japan s economic development remains a model for many technologically less advanced countries which have not yet mastered modern technology to organizational forms and a knowledge of japanese technological and economic history can contribute importantly to our understanding of economic growth in the modern era

this book studies the industrial development of japan since the mid nineteenth century with particular emphasis on how the various industries built technological capabilities the japanese were extraordinarily creative in searching out and learning to use modern technologies and the authors investigate the emergence of entrepreneurs who began new and risky businesses how the business organizations evolved to cope with changing technological conditions and how the managers engineers and workers acquired organizational and technological skills through technology importation learning by doing and their own randd activities the book investigates the interaction between private entrepreneurial activities and public policy through a general examination of economic and industrial development a study of the evolution of management systems and six industrial case studies textiles iron and steel electrical and communications equipment automobiles shipbuilding and aircraft and pharmaceuticals the authors show how the japanese government has played an important supportive role in the continuing innovation without being a substitute for aggressive business enterprise constantly venturing into unfamiliar terrains

this volume explores japan s industrialization from the perspective of indigenous development focusing on what may be identified as traditional or indigenous factors japanese industrialization has often been described as the process of transferring or importing technology and organization from western countries recent research has however shown that economic development had already begun in pre modern period tokugawa era in japan this economic development not only prepared japan for the transfer from the west but also formed the basis of the particular industrialization process which paralleled transplanted industrialization in modern japan the aim of the volume is to demonstrate this aspect of industrialization through the detailed studies of so called indigenous industries this collection of papers looks at the industries originating in the tokugawa era such as weaving silk reeling and pottery as well as the newly developed small workshops engaged in manufacturing machinery soap brush buttons etc small businesses in the tertiary sector transportation and commerce are also observed available for the first time in english these papers shed new light on the role of indigenous development and our understanding of the dualistic character of japan s economic development

in this book the contributors trace the origins of the post war japanese economic miracle and its spectacular effect on the region as a whole
