richard m coe has developed such a grammar one which uses a simple graphic instrument to analyze the meaningful relationships between sentences in a passage and to clarify the function of structure in discourse working in the tradition of christensen s generative rhetoric coe presents a two dimensional graphic matrix that effectively

analyzes the logical relations between statements by mapping coordinate subordinate and superordinate relationships coe demonstrates the power of his discourse matrix by applying it to a variety of significant problems such as how to demonstrate discourse differences between cultures especially between chinese and english how to explain precisely what is bad about the structure of passages that do not work and how best to teach structure this new view of the structure of passages helps to articulate crucial questions about the relations between form and function language thought and culture cognitive and social processes
