from darwin to star trek evans offers a lively look at the science of emotions and finds that whether we live in the shadow of times square or in the depths of the rain forest all humans feel disgust joy surprise anger fear and distress 20 halftones

while human beings might be rational animals they are emotional animals as well emotions play a central role in all areas of our lives and if we are to have a proper understanding of human life and activity we ought to have a good grasp of the emotions michael s brady structures emotion the basics around two basic yet fundamental questions what are emotions and what do emotions do in answering these questions brady provides insight into a core component of all our lives covering the nature of emotion emotion knowledge and understanding emotion and action emotions and social groups emotion morality and art in this concise and insightful introduction brady explains why we are often better off as a result of emotion rather than reason being in the driving seat as our lives both individual and social would be significantly impoverished without the emotions with a glossary of key terms and suggestions for further reading emotion the basics is an ideal starting point for anyone seeking a full introduction to the philosophical study of emotion

the laws of emotion is an accessible new book that reviews much of the insightful new research on emotions conducted over the last ten years it expands on the theory of emotions introduced in nico frijda s earlier work and addresses a number of unanswered basic problems on emotion theory the author s goal is to better understand the underlying psychological mechanisms of emotion in this new book professor frijda also examines previously neglected topics of emotion such as determinants of emotional intensity the duration of emotions and sexual emotions it touches on both evolutionary and

neuroscientific explanations the book begins by reviewing a number of principles governing emotion or the laws of emotion the author then examines the passionate nature of emotions and the motivational processes underlying them and the nature and causes of pleasure and pain professor frijda then explores the processes that lead to emotional arousal including cognitive influences and why people care more about certain things than others emotional intensity is then discussed including the often neglected topic of the course of emotions over time the book concludes with the author's insights into complex emotional domains such as sex revenge and the need to commemorate past events the laws of emotion will appeal to social cognitive and developmental psychologists social scientists philosophers and neuroscientists as well as anyone interested in the workings of the mind it also serves as a text for advanced courses in the psychology of emotions or the neuroscience of emotions

what is an emotion our natural way of thinking about the standard emotions is that the mental perception of some fact excites the mental affection called the emotion and that this latter state of mind gives rise to the bodily expression the thesis on the contrary is that the bodily changes follow directly the perception of the exciting fact and that our feeling of the same changes as they occur is the emotion common sense says we lose our fortune are sorry and weep we meet a bear are frightened and run we are insulted by a rival are angry and strike the hypothesis here to be defended says that this order of sequence is incorrect that the one mental state is not immediately induced by the other that the bodily manifestations must first be interposed between and that the more rational statement is that we feel sorry because we cry angry because we strike afraid because we tremble and not that we cry strike or tremble because we are sorry angry or fearful as the case may be without the bodily states following on the perception the latter would be purely cognitive in form pale colourless destitute of emotional warmth we might then see the bear and judge it best to run receive the insult and deem it right to strike but we

could not actually feel afraid or angry the functions and acts of ordinary life it is true still remain to me but in every one of them there is something wanting to wit the feeling which is proper to them and the pleasure which follows them each of my senses each part of my proper self is as it were separated from me and can no longer afford me any feeling this impossibility seems to depend upon a void which i feel in the front of my head and to be due to the diminution of the sensibility over the whole surface of my body for it seems to me that i never actually reach the objects which i touch i feel well enough the changes of temperature on my skin but i no longer experience the internal feeling of the air when i breathe all this would be a small matter enough but for its frightful result which is that of the impossibility of any other kind of feeling and of any sort of enjoyment although i experience a need and desire of them that render my life an incomprehensible torture
