the book uses both environmental movements and political theory to help define what is meant by environmental and ecological justice it will be useful to anyone interested in environmental politics environmental movements and justice theory

the emerging environmental justice movement has created greater awareness among scholars that communities from all over the world suffer from similar environmental inequalities this volume takes up the challenge of linking the focussed campaigns and insights from african american campaigns for environmental justice with the perspectives of this global group of environmentally marginalized groups the editorial team has drawn on washington s work on paul rosier s study of native american environmentalism and on heather goodall s work with indigenous australians to seek out wider perspectives on the relationships between memories of injustice and demands for environmental justice in the global arena this collection contributes to environmental historiography by providing bottom up environmental histories in a field which so far has mostly emphasized a top down perspective in which the voices of those most heavily burdened by environmental degradation are often ignored the essays here serve as a modest step in filling this lacuna in environmental history by providing the viewpoints of peoples and of indigenous communities which traditionally have been neglected while linking them to a global context of environmental activism and education scholars of environmental justice as much as the activists in their respective struggle face challenges in working comparatively to locate the differences between local struggles as well as to celebrate their common ground in this sense the chapters in this book represent the opening up of spaces for future conversations rather than any simple ending to the discussion the contributions however reflect growing awareness of that common ground and a rising need to employ linked experiences and strategies in combating environmental injustice on a global scale in part by mimicking the technology and tools employed by global corporations that endanger the environmental integrity of a diverse set of homelands and ecologies

although it is commonly asserted that enhanced citizen participation results in better environmental policy and improved enforcement of environmental standards this hypothesis has rarely been subject to testing on a comparative basis the contributors to this book set out to study the extent to which citizens can and do exert influence over their urban environments through the legal and extra legal gateways in eleven countries spanning several continents as well as different climates levels and type of economic development and national legal and

constitutional systems as well as exhibiting a different set of environmental problems one interviewee questioned about access to environmental justice dryly remarked that in his city there was no environment no justice and no access to either yet this view as will be seen requires to be nuanced while few people will be surprised by the finding that legal gateways to environmental justice are largely ineffective the reasons for this are revealing but also the richness of detail and the comparisons between the different countries and also the positive aspects which surfaced in several instances were indeed both encouraging and sometimes surprising this book presents the first comparative survey of access to environmental justice and will be of considerable use to lawyers policy makers activists and scholars who are concerned with the environmental issues which so profoundly affect and afflict our habitat and conditions of social justice throughout the world

in this cutting edge volume leading scholars examine a diverse range of environmental inequalities from around the world shows how far the field has moved beyond its original focus on uneven distributions of pollution in the usa considers the influence of critical geographical and social theory on environmental justice studies examines a range of possibilities for future research directions explores the challenges of investigating and pursuing environmental justice at a time of rapid economic and environmental change

the routledge handbook of environmental justice presents an extensive and cutting edge introduction to the diverse rapidly growing body of research on pressing issues of environmental justice and injustice with wide ranging discussion of current debates controversies and questions in the history theory and methods of environmental justice research contributed by over 90 leading social scientists natural scientists humanists and scholars from professional disciplines from six continents it is an essential resource both for newcomers to this research and for experienced scholars and practitioners the chapters of this volume examine the roots of environmental justice activism lay out and assess key theories and approaches and consider the many different substantive issues that have been the subject of activism empirical research and policy development throughout the world the handbook features critical reviews of quantitative qualitative and mixed methodological approaches and explicitly addresses interdisciplinarity transdisciplinarity and engaged research instead of adopting a narrow regional focus it tackles substantive issues and presents perspectives from political and cultural systems across the world as well as addressing activism for environmental justice at the global scale its chapters do not simply review the state of the art but also propose new conceptual frameworks and directions for research policy and practice providing detailed but accessible overviews of the complex

varied dimensions of environmental justice and injustice the handbook is an essential guide and reference not only for researchers engaged with environmental justice but also for undergraduate and graduate teaching and for policymakers and activists

environmental justice is the concept that minority and low income individuals communities and populations should not be disproportionately exposed to environmental hazards and that they should share fully in making the decisions that affect their environment this volume examines the sources of environmental justice law and how evolving regulations and court decisions impact projects around the country

women make up the vast majority of activists and organizers of grassroots movements fighting against environmental ills that threaten poor and people of color communities this collection of essays pays tribute to the contributions women have made in these endeavors the writers offer varied examples of environmental justice issues such as children s environmental health campaigns cancer research aids hiv activism the environmental genome project and popular culture among many others each one focuses on gender and sexuality as crucial factors in women s or gay men s activism and applies environmental justice principles to related struggles for sexual justice drawing on a wide variety of disciplinary perspectives the contributors offer multiple vantage points on gender sexuality and activism back cover

environmental justice aspires to a healthy environment for all as well as fair and inclusive processes of environmental decision making in order to develop successful strategies to achieve this it is important to understand the factors that shape environmental justice outcomes this optimistic accessible and wide ranging book contributes to this understanding by assessing the extent of and reasons for environmental justice injustice in seven diverse countries united states republic of korea south korea united kingdom sweden china bolivia and cuba factors discussed include race and class discrimination citizen power industrialisation processes political economic context and the influence of dominant environmental discourses in particular the role of capitalism is critically explored based on over a hundred interviews with politicians experts activists and citizens of these countries this is a compelling analysis aimed at all academics policy makers and campaigners who are engaged in thinking or action to address the most urgent environmental and social issues of our time
