this book seeks to reframe the normative narrative of the culpable person in american criminal law through a more humanising lens it embraces such a reframed narrative to revise the criteria of the current voluntarist architecture of culpability and to advance a paradigm of punishment that positions social rehabilitation as its core principle the book constructs this narrative by considering behavioural and neuroscientific insights into the functions of emotions and socio environmental factors within moral behaviour in social settings hence it suggests culpability notions that reflect a more contextualised view of human conduct and argues that such revised notions are better suited to the principle of personal guilt furthermore it suggests a model of punishment that values the dynamic power of change of individuals and acknowledges the importance of social relationships and positive environments to foster patterns of social re integration ultimately this book argues that the potential adoption of the proposed models of culpability and punishment which view people through a more comprehensive lens may be a key factor for turning criminal justice into a less punitive more inclusionary and non stigmatising system

this long-awaited book by a pioneer in brain research offers a new model of our emotions their origins their power and their malleability for more than thirty years richard davidson has been at the forefront of brain research now he gives us an entirely new model for understanding our emotions as well as practical strategies we can use to change them davidson has discovered that personality is composed of six basic emotional styles including resilience self awareness and attention our emotional fingerprint results from where on the continuum of each style we fall he explains the brain chemistry that underlies each style in order to give us a new model of the emotional brain one that will even go so far as to affect the way we treat conditions like autism and depression and finally he provides strategies we can use to change our own brains and emotions if that is what we want to do written with bestselling author sharon begley this original and exciting book gives us a new and useful way to look at ourselves develop a sense of well being and live more meaningful lives
