this book is a biography of a remarkable scottish missionary worker alexander wylie a classical nineteenth century artisan and autodidact with a gift and passion for languages and mathematics he made significant contributions to knowledge transfer both to and from china in missionary work as a printer playing an important role in the production and distribution of a new chinese translation of the bible as a teacher translating into chinese key western texts in science and mathematics including newton and euclid and publishing

the first chinese textbooks on modern symbolic algebra calculus and astronomy and as a writer in english and an internationally recognised major sinologist bringing to the west much knowledge of china and contributing extensively to the development of british sinology the book concludes with an overall evaluation of wylie s contribution to knowledge transfer to and from china noting the imbalance between the significant corpus of scholarly work specifically on wylie by chinese scholars in chinese and the lack of academic studies by western scholars in english

this publication covers papers presented at aied2009 part of an ongoing series of biennial international conferences for top quality research in intelligent systems and cognitive science for educational computing applications the conference provides opportunities for the cross fertilization of techniques from many fields that make up this interdisciplinary research area including artificial intelligence computer science cognitive and learning sciences education educational technology psychology philosophy sociology anthropology linguistics and the many domain specific areas for which aied systems have been designed and evaluated aied2009 focuses on the theme building learning systems that care from knowledge representation to affective modelling the key research question is how to tackle the complex issues related to building learning systems that care ranging from representing knowledge and context to modelling social cognitive metacognitive and affective dimensions this requires multidisciplinary research that links theory and technology from artificial intelligence cognitive science and computer science with theory and practice from education and the social sciences
