in its first two decades much of cognitive science focused on such mental functions as memory learning symbolic thought and language acquisition the functions in which the human mind most closely resembles a computer but humans are more than computers and the cutting edge research in cognitive science is increasingly focused on the more mysterious creative aspects of the mind the way we think is a landmark synthesis that exemplifies this new direction the theory of conceptual blending is already widely known in laboratories throughout the world this book is its definitive statement gilles fauconnier and mark turner argue that all learning and all thinking consist of blends of metaphors based on simple bodily experiences these blends are then themselves blended together into an increasingly rich structure that makes up our mental functioning in modern society a child's entire development consists of learning and navigating these blends the way we think shows how this blending operates how it is affected by and gives rise to language identity

and concept of category and the rules by which we use blends to understand ideas that are new to us the result is a bold exciting and accessible new view of how the mind works

the practice of court interpreting describes how the interpreter works in the court room and other legal settings the book discusses what is involved in court interpreting case preparation ethics and procedure the creation and avoidance of error translation and legal documents tape transcription and translation testifying as an expert witness and continuing education outside the classroom the purpose of the book is to provide the interpreter with a map of the terrain and to suggest methods that will help insure an accurate result the author herself a practicing court interpreter says the structure of the book follows the structure of the work as we do it the book is intended as a basic course book as background reading for practicing court interpreters and for court officials who deal with interpreters

researching pedagogic tasks brings together a series of empirical studies into the use of pedagogical tasks for second language learning with a view to better understanding the structure of tasks their impact on students and their use by teachers the volume starts with an introduction to the background and key issues in the topic area and is then organised into three sections the first section focuses on the language and learning of students on tasks the second on the use of tasks in the language classroom the third on the use of tasks for language testing each section begins with a succinct section introduction and the volume concludes with an afterword relating the theme of the volume to issues in curriculum development the chapters include both experimental and qualitative approaches to the topic some providing original accounts of specific studies others offering overviews of linked series of studies

this volume constitutes the refereed proceedings of the 11th international conference on hybrid artificial intelligent systems hais 2016 held in seville spain in april 2016 the 63 full papers published in this volume were carefully reviewed and selected from 150 submissions they are organized in topical sections on data mining and knowledge discovery time series bio inspired models and evolutionary computation learning algorithms video and image classification and cluster analysis applications bioinformatics and hybrid intelligent systems for data mining and applications
