financial markets actors institutions and technologies are increasingly determining which kinds of services and welfare are available how these are narrated and what comes to represent the common sense in the policy world and in everyday life this element problematises the rationale and operation of one such financial technology private health insurance and the industry it inhabits it offers a cross disciplinary overview of the various drivers of these markets in middle income countries and their appeal for development institutions and for governments using a range of illustrative case examples and drawing on critical scholarship it considers how new markets are pursued and how states are entangled with market development it reflects on how the private health insurance sector in turn is shaping and segmenting health systems and also our ideas about rights fairness and responsibility

this book discusses how the current health insurance market structure affects the two policy goals of expanding health insurance coverage and containing health care costs concerns about concentration in health insurance markets are linked to wider concerns about the cost quality and availability of health care the market structure of the health insurance and hospital industries may have contributed to rising health care costs and deteriorating access to affordable health insurance and health care many features of the health insurance market and the ways it links to other parts of the health care system can hinder competition lead to concentrated markets and produce inefficient outcomes

statistics published by the u s department of commerce 1980 indicate that in 1977 we spent 8.1 of our gross national product gnp on life health property casualty and other forms of insurance an additional 5.7 was used to pay the social security tax which is another form of insurance premium for a total of 14.8 of the gnp although insurance had its historical origin in marine insurance it has now developed into one of the major industries of the american economy and extends into many areas of economic activity one area where growth has been particularly strong is the medical sector

health insurance is a major institution in all industrialized countries it became a government responsibility in 1883 when bismarck introduced a compulsory program of health insurance for industrial workers in germany programs for workers in various industrial and income categories soon followed in other european countries austria 1888 hungary 1891 norway 1909 servia 1910 great britain 1911 and russia and romania 1912 rubinow 1913 250 programs in these countries were extended in subsequent years and other countries in europe followed with their own programs consequently today most industrial countries have universal or near universal health insurance coverage in the united states the issue of national health insurance has been seriously debated since just prior to world war i and polling data since the 1930s show that a substantial majority of the public has been supportive of such a program erskine 1975

this book explores three aspects of the health insurance market for small firms the economic underpinnings of purchasing difficulties and policy implications the politics of change and health plan choice behaviour

the health insurance industry has changed gone are the days when you paid your premium and your plan picked up the tab for all your health care nowadays the average deductible is over 2 000 which means that you will have to pay for most if not all of your health care in any given year even worse are the dirty marketing tricks used to sell health insurance you can spend thousands of dollars a year on a policy that you ll most likely never use or you can spend even more to get a lower deductible that only gives you the illusion of better coverage in this book physician and licensed health insurance agent dr kevin wacasey shows you how to save money on health insurance and health care first he cuts through the complexity of buying health insurance by proving that upgraded plans with supposedly better coverage often end up costing more than you could ever save next dr wacasey takes the reader along as he shops for a health insurance plan then using a simple formula to compare ten different scenarios pulled straight from healthcare gov dr wacasey demonstrates that in all ten cases the bronze plan will end up saving the consumer the most money both in sickness and in health finally dr wacasey reveals how much health care goods and services really cost and offers tips on how patients can save money on everything from ambulances to operations individuals business owners and anyone else who has to pay for health insurance or for health care will find dr wacasey s book invaluable as he shows how to save lots of money yet receive better care than ever before in the first consumer driven health care system the u s has ever known
