The journey involves intense physical training, mental mastery, technological proficiency, and a commitment to justice within societal norms. jonathan lowe argues that metaphysics should be restored to a central position in

philosophy as the most fundamental form of rational inquiry whose findings underpin those of all other disciplines he portrays metaphysics as charting the possibilities of existence by identifying the categories of being and the relations of ontological dependency between entities of different categories he proceeds to set out a unified and original metaphysical system he defends a substance ontology according to which the existence of the world's one world in time depends upon the existence of persisting things which retain their identity over time and through processes of qualitative change and he contends that even necessary beings such as the abstract objects of mathematics depend ultimately for their existence upon there being a concrete world of enduring substances within his system of metaphysics lowe seeks to answer many of the deepest and most challenging questions in philosophy

answering the question how is fruitful discussion possible this book addresses the central philosophical issue of how reason shall be understood and how it is limited this study argues that the understanding of discussion according to which it necessarily starts from putative universal norms and rules for argumentation is problematic among other reasons since such rules are unfruitful in contexts where there are vast disagreements such as religion inspired by wittgensteinian ideas strandberg develops instead a new way of understanding discussion truth and rationality which escapes these problems and shows how this solution can be used to answer the accusation against wittgensteinian philosophy for being conservative and resulting in fideism
