this book explores the relationship of mutual trust and fundamental rights in the area of freedom security and justice afsj of the european union and asks whether there is any role for proportionality mutual trust among member states has long been presumed by the court in a manner that mutual recognition was prioritised in regard to but to the detriment of the protection of fundamental rights after thoroughly reviewing this relationship this book offers a comprehensive framework of proportionality and explores its impact on the protection of fundamental rights in a mutual trust environment it applies a theoretical and a normative framework of proportionality to two case studies eu criminal and asylum law by reference to several fundamental rights enabling a carefully constructed analysis with useful parallels the book argues that such analysis based on proportionality is not always desirable and helpful for the protection of fundamental rights in this area and thoroughly explores its impact on the protection of fundamental rights vis à vis mutual trust

discussions of rights are ubiquitous one constantly hears things such as the chinese are violating tibetan rights landlords have a right that their tenants pay their rent students have a right to be graded fairly animals have a right not to suffer merely to bring pleasure to humans abortion violates a fetus right to life we violate the rights of future generations when we pollute the water these statements assert that tibetans landlords students animals fetuses and future generations all have rights tibetans landlords students animals fetuses and future generations do not seem to have much in common when one presses for clarity it is very difficult to say precisely what a right is what is it to have a right that is the question this book seeks to answer to paint with an overly broad brush previous answers to this question can be divided into two groups some hold interest bene t theories of rights while others hold choice will theories of rights perhaps the rst person to propose an interest bene t theory was jeremy bentham its most cited contemporary defender is joseph raz the seminal statement of the choice theory was made by h l a hart carl wellman is perhaps the most able defender of a will theory of rights the debate between these two groups of theories has been a productive one

building on many years of scholarship matthew h kramer sets out his definitive philosophical investigation of rights and rights holding with this monograph as he sometimes revisits and modifies his previous positions beginning with the analytical schema propounded by the american legal theorist wesley hohfeld the book provides a defence of the proposition that every claim right with a certain content is correlative to at least one duty with the same content and that every duty with a certain content is correlative to at least one claim right with the same content the volume then addresses the longstanding debates over the nature of right holding with a sustained defense of the interest theory and with some innovative critiques of the will theory finally it considers the ethical and analytical questions involved in determining who can hold claim rights at all it argues that the beings capable of holding claim rights include not only human adults of sound mind but also all other living human beings many dead people and all future generations of people along with most non human animals addressing some major topics within moral legal and political philosophy rights and right holding a philosophical investigation will be a key work for philosophers and academic lawyers alike
