the first paper in this volume of studies presents the ethical framework the commission adopted a modified ethic of care and a set of guiding principles that were used as a prism through which to view the technologies the volume then goes on to explore some of the ethical issues raised by the development and use of new reproductive technologies

cloning genetic screening embryo freezing in vitro fertilization norplant ru486 these are the technologies revolutionizing our reproductive landscape through the lens of procreative liberty meaning both the freedom to decide whether or not to have children as well as the freedom to control one's reproductive capacity john robertson a leading legal bioethicist analyzes the ethical legal and social controversies surrounding each major technology and opens up a multitude of fascinating questions do frozen embryos have the right to be born should parents be allowed to select offspring traits may a government force welfare recipients to take contraceptives robertson's arguments examine the broad range of consequences of each reproductive technology and offers a timely multifaceted analysis of the competing interests at stake for patients couples doctors policymakers lawyers and ethicists

this collection of essays provides an overview of the social developments associated with the new reproductive technologies it assesses the significance of these new technologies for the field of the sociology of technology as a whole

with attention to the ways in which new reproductive technologies facilitate the gradual disembodiment of reproduction this book reveals the paradox of women's reproductive experience in patriarchal cultures as being both and often simultaneously empowering and disempowering a rich exploration of birth appropriation in the west new reproductive technologies and disembodiment investigates the assimilation of women's embodied power into patriarchal systems of symbolism culture and politics through the inversion of women's and men's reproductive roles contending that new

reproductive technologies represent another world historical moment both in their forging of novel social relations and material processes of reproduction and their manner of disembodiment of women in unprecedented ways a disembodiment evident in recent visual and literary popular and academic texts this volume locates the roots of this disembodiment in western political discourse a call to feminist political theory to re remember the material dimensions of bodies and their philosophical significance new reproductive technologies and disembodiment will appeal to scholars of sociology gender studies political and social theory and the study of science technology and health

in the first book to examine the industry of reproductive technology from the perspective of the consumer gay becker scrutinizes the staggering array of medical options available to women and men with fertility problems and assesses the toll both financial and emotional that the quest for a biological child often exacts from would be parents becker interviewed hundreds of people over a period of years their stories are presented here in their own words absorbing informative and in many cases moving these stories address deep seated notions about gender self worth and the cultural ideal of biological parenthood becker moves beyond people s personal experiences to examine contemporary meanings of technology and the role of consumption in modern life what emerges is a clear view of technology as culture with technology the template on which issues such as gender nature and the body are being rewritten and continuously altered the elusive embryo chronicles the history and development of reproductive technology and shows how global forces in consumer culture have contributed to the industry s growth becker examines how increasing use of reproductive technology has changed ideas about natural pregnancy and birth discussing topics such as in vitro fertilization how men and women naturalize the use of a donor and what happens when new reproductive technologies don t work becker shows how the experience of infertility has become increasingly politicized as potential parents confront the powerful forces that shape this industry the elusive embryo is accessible well written and well documented it will be an invaluable resource for people using or considering new reproductive technologies as well as for social scientists and health professionals

this document presents papers on the following topics an overview of the science and technology system an overview of select social and economic forces influencing the development of in vitro fertilization and related assisted reproductive techniques an overview of commercial involvement in

new reproductive technologies the role of the biotechnology industry in the development of clinical diagnostic materials for prenatal diagnosis a report on a survey of members of the pharmaceutical manufacturers association of canada and biotechnology companies the potential role of schools in promoting reproductive health and understanding of new reproductive technologies and social welfare and new reproductive technologies

in the early 1980s the new reproductive technologies available supposedly offered infertile women a chance to have children however there was growing concern that the determination of scientists to dominate nature their disregard for women's well being and the financial gains to be made from these technologies would together result in the increased modification of all women's lives and the loss of even more control over our own bodies originally published in 1985 the essays in *Man Made Women* describe the technologies being used and researched in the areas of in vitro fertilization test tube babies sex predetermination and embryo transfer at the time they discuss the practical application of the technologies on an international scale and draw attention to the racist and classist assumptions on which they are based there is also information about the international action that feminists had begun to counter these so called benevolent and therapeutic technologies *Man Made Women* hoped to encourage women to start questioning the miracle of these new reproductive technologies and to become involved in crucial decisions about their bodies and their lives

will procreation become just another commodity in the marketplace with designer sperm ova and embryos offered for sale will the attention and monies focused on the new reproductive technologies take away resources from infertility prevention prenatal care and adoption if states move to regulate such practices will this encourage widespread governmental interference in reproductive choice how will society look at the biologically unique children who are the products of genetic manipulation and more importantly how will these children view themselves this controversial book explores the answers to these questions that are frequently being asked as the battles over reproductive technologies and freedoms become more heated and touch more people's lives *Embryos Ethics and Women's Rights* examines both the clinical and personal perspectives of reproductive technologies experts explain and debate the growing number of procreative possibilities in vitro fertilization genetic manipulation of embryos embryo transfer surrogacy prenatal screening and the fetus as patient some of the leading authorities in the field including John Robertson Ruth Hubbard and Gena Corea address the ethical legal religious social and psychological concerns that are inherent in the issues essential reading for every person

concerned with control over basic issues of human destiny embryos ethics and women s rights provides unique and comprehensive coverage on the subject of technologically controlled childbearing and particularly its effects on mothers and their unborn children

the international covenant on civil and political rights the international covenant on economic social and cultural rights and the covenant on the elimination of all forms of discrimination against women all contain certain principles which canada as a party to these treaties is obligated to respect this paper identifies those substantive rights which may be applicable to the area of new reproductive technologies and suggests avenues for research to determine their implications for what legislatures may do within the terms and spirit of the conventions by which canada is bound the right to life to liberty and security to marry and found a family to private and family life to information and education to reproductive health and health care to the benefits of scientific progress and to sexual non discrimination may all have relevance to the field of new reproductive technologies

this document contains papers on the following topics a review of medically assisted reproductive technologies a socio historical examination of the development of in vitro fertilization and related assisted reproductive techniques the professions involved in new reproductive technologies legislation inquiries and guidelines on infertility treatment and surrogacy preconception contracts an overview of donor insemination issues and responses to artificial insemination the social meanings of donor insemination lesbian women and donor insemination self insemination in canada the conceptual framework of donor insemination and a bibliography of artificial insemination

cloning genetic screening embryo freezing in vitro fertilization norplant ru486 these are the technologies revolutionizing our reproductive landscape through the lens of procreative liberty meaning both the freedom to decide whether or not to have children as well as the freedom to control one s reproductive capacity john robertson a leading legal bioethicist analyzes the ethical legal and social controversies surrounding each major technology and opens up a multitude of fascinating questions do frozen embryos have the right to be born should parents be allowed to select offspring traits may a government force welfare recipients to take contraceptives robertson s arguments examine the broad range of consequences of each reproductive technology and offers a timely multifaceted analysis of the competing interests at stake for patients couples doctors policymakers lawyers and ethicists cloning genetic screening embryo freezing in vitro fertilization norplant ru486 these are the technologies revolutionizing our

this book examines the new technologies which intervene in the process of human reproduction in three areas contraception assisted reproduction genetics and prenatal diagnosis the author clarifies that technologies in these categories can and do overlap she discusses the implications for women's health and autonomy the roles of women and men and the reproduction of gender relations and the politics of reproduction

arthur I caplan it is commonly said especially when the subject is assisted reproduction that medical technology has outstripped our morality yet as the essays in this volume make clear that is not an accurate assessment of the situation medical technology has not overwhelmed our morality it would be more accurate to say that our society has not yet achieved consensus about the complex ethical issues that arise when medicine tries to assist those who seek its services in order to reproduce nevertheless there is no shortage of ethical opinion about what we ought to do with respect to the use of surrogate mothers in vitro fertilization embryo transfer artificial insemination or fertility drugs nor is it entirely accurate to describe assisted reproduction as technology the term technology carries with it connotations of machines buzzing and technicians scurrying about trying to control a vast array of equipment yet most of the methods used to assist reproduction that are discussed in this volume do not involve exotic technologies or complicated hardware it is technique more than technology that dominates the field of assisted reproduction efforts to help the infertile by means of the manipulation of human reproductive materials and organs date 12 caplan back at least to biblical times human beings have engaged in all manner of sexual practices and manipulations in attempts to achieve reproduction when nature has balked at allowing life to begin

from the beginning the royal commission on new reproductive technologies was committed to learning about and understanding the social values and

attitudes of Canadians commissioners felt that these values and attitudes which are not static but evolve over time provide a vital context for decision making about the technologies and must be considered in recommendations of policy in this area

these essays written at the time when the bill for human fertilization and embryology act 1990 was going through parliament touch on the British debate on in vitro fertilization gamete donation and maternal surrogacy from an anthropological perspective the implications of the medical developments that lay behind the act are world wide and these new procreative possibilities formulate new possibilities for thinking about kinship the essays are informed by recent re thinking of models of kinship in Melanesia

this book explores the issues that surround medically assisted reproduction it addresses the place of destiny including how to think about individual destinies in an age of increasingly accessible gene sequencing paired with a growing link between procreation and prediction
