can we talk meaningfully about god the theological movement known as grammatical thomism affirms that religious language is nonsensical because the reality of god is beyond our capacity for expression stephen mulhall critically evaluates the claims of this movement as exemplified in the work of herbert mccabe and david burrell to be a legitimate inheritor of wittgenstein s philosophical methods as well as aquinas s theological project the major obstacle to this claim is that grammatical thomism makes the nonsensicality of religious language when applied to god a touchstone of thomist insight whereas nonsense is standardly taken to be solely a term of criticism in wittgenstein s work mulhall argues that if wittgenstein is read in the terms provided by the work of cora diamond and stanley cavell then a place can be found in both his early work and his later writings for a more positive

role to be assigned to nonsensical utterances one which depends on exploiting an analogy between religious language and riddles and once this alignment between wittgenstein and aquinas is established it also allows us to see various ways in which his later work has a perfectionist dimension in that it overlaps with the concerns of moral perfectionism and in that it attributes great philosophical significance to what theology and philosophy have traditionally called perfections and transcendentals particularly concepts such as being truth and unity or oneness this results in a radical reconception of the role of analogous usage in language and so in the relation between philosophy and theology

foundationalism is the view that philosophical propositions are of two kinds those which need supporting evidence and those which in themselves provide the evidence which renders them irrefutable this book originally published 1988 describes the battle between foundationalism which places belief in god in the first category and various other approaches to the problem of faith reformed epistemology hermeneutics and sociological analysis in the concluding section of the book an examination of concept formation in religious belief is used to reinterpret the gap between the expressive power of language and the reality of god
