the establishment of the intergovernmental platform on biodiversity and ecosystem services ipbes points to the crucial role attributed to science and knowledge for the successful implementation of biodiversity politics by both scientists and policy makers with the increased importance of biodiversity in international politics and in part inspired by the success the intergovernmental panel on climate change ipcc has had in raising awareness of global warming the call for an ipcc for biodiversity was successful the politics of knowledge and global biodiversity gives a full overview of the process of its implementation as finalised in 2013 and proposes an innovative conceptual framework that puts this specific case into a more general perspective of international politics and relations it provides a detailed empirical analysis of the knowledge politics associated with the establishment of ipbes and its conceptual framework and methodological approach is grounded in a theoretical perspective this pioneering work is the first to examine ipbes in this way and is essential reading for researchers and scholars of international relations environmental and biodiversity politics science policy interfaces and global environmental governance it will also be of interest to political scientists and social scientists

twenty years after the convention on biological diversity cbd entered into force the founding of the intergovernmental platform on biodiversity and ecosystem services ipbes in 2012 was the outcome of a long process of setting biodiversity issues at the top of the global environmental agenda with contributions from more than a dozen well renowned researchers in political science law and sociology this book analyzes ipbes functioning and challenges in terms of the knowledge selection process and actors involved the book reveals that through its conceptual framework ipbes promotes a pluralistic view of nature that calls for a broadening of the disciplinary frontiers it combines natural science and social science research and also includes indigenous and local knowledge ipbes is considered to represent the

institutionalization of a permanent knowledge assessment on biodiversity and is often referred to as an ipcc success story constituting a new stage in global environmental governance in analyzing the knowledge selection process for ipbes decision making the book better situates ipbes within the biodiversity and global governance domain it ultimately argues that the establishment of ipbes provides a new opportunity to coordinate the different international conventions cbd ramsar cites etc and initiatives international assessment of marine biology scientific programs funding etc
