in this important book niklas luhmann uses his powers as an analyst of the social system to examine two of the most important

concepts which hold that system together and allow it to evolve trust and power he criticises those theoretical accounts whose roots lie in what he refers to as ideologies accounts which use implicit beliefs in particular conceptions of human nature to explain and predict social action in a one dimensional way theories of rational choice and moralistic explanations are taken to task as are the theories of both marx and habermas luhmann s unique scientific sociology underpins every page and enables him to highlight the potential shortcomings of these narrative approaches underlying this approach is the idea that ideologically based social theory whether critical or conservative is unable to do justice to the complexities existing within the parameters of social systems individuals and the interactions between them he aims to show instead how only a painstaking systems analysis can capture these intricacies although written over 40 years ago luhmann s complex vision of the operations of trust and power provides a wealth of insights of considerable value to scholars and students grappling with contemporary social and economic problems the editors introduction to this new edition and the significant revisions they have made to the translation will help to reveal the richness and clarity of this vision and its relevance to the ways that trust and power operate in today s society

the pharaohs were masters of the Nile they had a detailed understanding of the ways of the river modern Egyptians see themselves as heirs to this tradition and as owners of the Nile waters in the 1960 s Egypt decided to protect its increasingly populated Nile valley from the ravages of annual flooding by building a dam a relatively small dam in the valley of Nubia in the region of Tushka would have enabled the excess floodwaters to safely be diverted towards the fossil valley of the pre Nile however it was decided to select a site near Aswan making it necessary to inundate more than 250km of river valley over the years this strategy has been revealed to have been faulty and numerous irrigation schemes in upriver countries have progressively reduced the amount of water descending into Egypt the dire warning of the 14th century oracle appears to be prophetic the water of the river in my country will be stopped from reaching yours which I shall cause to die of thirst
