in this rich and absorbing analysis of the transformation of political thought in nineteenth century japan douglas howland examines the transmission to japan of key concepts liberty rights sovereignty and society from western europe and the united states because western political concepts did not translate well into their language japanese had to invent terminology to engage western political thought this work of westernization served to structure historical agency as japanese leaders undertook the creation of a modern state where scholars have previously treated the introduction of western political thought to japan as a simple migration of ideas from one culture to another howland undertakes an unprecedented integration of the history of political concepts and the semiotics of translation techniques he demonstrates

that japanese efforts to translate the west must be understood as problems both of language and action as the creation and circulation of new concepts and the usage of these new concepts in debates about the programs and policies to be implemented in a westernizing japan translating the west will interest scholars of east asian studies and translation studies and historians of political thought liberalism and modernity

international environment is a crucial factor in determining the developmental path pursued by democratizing great powers democracies are thought to be less belligerent than traditional autocracies yet japan germany italy became reckless expansionist powers during their democratization processes based upon historical case studies this work suggests a general pattern regarding democratization and foreign expansion by examining the degree to which the military is oriented and the cohesion of economic social groups in the face of military assault ohara then attempts to draw lessons useful for present day democratization in china and russia military social groups the king and the nobility dominate domestic society in a traditional autocracy a secure domestic position allows the sovereign to focus on international survival and dominance however during the democratization period emerging economic and social groups bourgeoisie and labor challenge the dominance of the military social groups when the military regards this challenge as more threatening than international survival the possibility for a state to become a reckless expansionist emerges identifying possible causal relationships and producing realistic policy prescriptions is not enough to avert the trend ohara contends one must propose multiple policy options viable at any given point as well as various fall back plans to be implemented as necessary
