military historical case studies provide insight for military planners  
military planners cannot afford to ignore history when planning in today's complex environment  
this thesis analyzes military doctrinal changes and adaptation during Britain's boer war and the french counterinsurgency

war in algeria the boer war serves as an example of doctrinal change during a counterinsurgency campaign the french experience demonstrates the difficult task of fighting against an ambiguous enemy who uses terrorism as its primary tactic a counterinsurgency comparison and analysis focuses on three issues present in both case studies population control measures operational tactics and the civil military operations the conclusion offers solutions to the military situation today based on the british and french counterinsurgency this thesis argues history provides us military planners with the background to develop a successful counterinsurgency strategy for today s environment

this study investigates how relations between france and algeria have been represented and contested through visual means since the outbreak of the algerian war in 1954

this book will enlighten readers on the importance of literature in contributing to historical knowledge will provide readers with comprehensive understanding of the development of writing by french authors of algerian origin from its emergence in the 1980s to the present day emphasizes the contemporary relevance of the algerian war and the afterlives of empire on twenty first century society and culture

beginning as a small seemingly insignificant rebellion in 1954 the algerian struggle for independence assumed such proportions that it strangled france s foreign policy threatened her international relations poisoned the political atmosphere and toppled one government after another in this book first published in 1963 a specialist on french affairs assesses the impact on france of the algerian problem the various attempts to solve that problem and the implications of the solution finally found it is a study of conflict a careful consideration of the interaction between internal politics and a peculiarly difficult external problem and most of all an objective and lucid presentation of the essential elements of a tragic episode in french history

alongside the diplomatic struggles of the early cold war european politicians worked to shape emotions about the postwar order advocating fear of communism and hope for postwar recovery in this context the french empire in north africa emerged as one important emotional battleground where algerian nationalists and anti colonial campaigners challenged french narratives about imperial pride and native hysteria during the algerian war 1954 1962 emotions thus became a pivotal part of the independence struggle accordingly decolonizing emotions tracks affective politics during the revolution focusing on members of the front de libération nationale fln combattants de la libération cdl and jeune résistance delving into the manifestos poetry and personal diaries of anti colonial activists the book reveals a rich world of transgressive sentiments emotional exile and affective border crossings the stories that surface show how algerians used biopower to combat an affective regime that refused native populations the right to be angry the book further chronicles how europeans complicated ideas of humanitarian pity and confronted

the french production of political apathy it is a history that holds modern relevance speaking to contemporary debates over race relations and national pride the pathologizing of muslim emotions and the contested process of how myths die demythologization

the relationship between algeria and france that formed during the 132 years of colonial rule did not end in 1962 when algeria gained its independence this long period of occupation left an indelible mark on the social fabric of both societies one that continues to influence their cultures identities and politics wide ranging in scope yet complementary in focus the essays deftly convey the extent to which the french colonial experience in algeria resonates on both sides of the mediterranean young and established scholars shed light on the linguistic cultural and social mechanisms of violence remembrance forgetting fantasy nostalgia prejudice mythmaking and fractured identity addressing the nature of franco algerian relations through such topics as migration displacement settler colonialism racism and sexuality these essays provide an important contribution to postcolonial studies cultural studies and north african history with renewed public debate surrounding the two countries shared past and their interwoven communities today this volume will be indispensable for anyone with an interest in the relations between algeria and france and the literature on memory and nostalgia

in 1962 almost one million people were evacuated from algeria france called these citizens repatriates to hide their french algerian origins and to integrate them into society this book is about repatriation and how it became central to france s postcolonial understanding of decolonization the algerian past and french identity

in this account of the algerian war s effect on french political structures and notions of national identity todd shepard asserts that the separation of algeria from france was truly a revolutionary event with lasting consequences for french social and political life for more than a century algeria had been legally and administratively part of france after the bloody war that concluded in 1962 it was other its eight million algerian residents deprived of french citizenship while hundreds of thousands of french pieds noirs were forced to return to a country that was never home this rupture violated the universalism that had been the essence of french republican theory since the late eighteenth century shepard contends that because the amputation of algeria from the french body politic was accomplished illegally and without explanation its repercussions are responsible for many of the racial and religious tensions that confront france today in portraying decolonization as an essential step in the inexorable tide of history the french state absolved itself of responsibility for the revolutionary change it was effecting it thereby turned its back not only on the french of algeria muslims in particular but also on its own republican principles and the 1958 constitution from that point onward debates over assimilation identity and citizenship once focused on the algerian province colony have troubled france itself in addition to grappling

with questions of race citizenship national identity state institutions and political debate shepard also addresses debates in jewish history gender history and queer theory

the algerian war 1954 62 was one of the most prolonged and violent examples of decolonization at times horribly savage it was an undeclared war in the sense that no formal declaration of hostilities was ever made bringing to an end one hundred and thirty two years of french rule the algerian struggle caused the fall of six french prime ministers the collapse of the fourth republic and expulsion of one million french settlers this volume bringing together leading experts in the field focuses on one of the key actors in the drama the french army they show that the algerian war was just as much about conflicts of ideas beliefs and loyalties as it was about simple military operations in this way the collection goes beyond polemic and recrimination to explore the many and varied nuances of what was one of the historically most important of the grand style colonial wars

the foundations of the algerian war were laid more than a century before the first shots were fired in november 1954 rooted in the peculiar nature of french colonization in north africa and the complex relationship between colonizers and colonized that developed over generations unlike other french colonies that maintained clear distinctions between metropolitan france and overseas territories algeria was legally incorporated as an integral part of france itself divided into three départements that were theoretically equal to any department in mainland france this administrative fiction would prove to be both the source of french determination to retain algeria and the fundamental contradiction that made peaceful resolution of nationalist demands nearly impossible the french conquest of algeria began in 1830 when charles x s government seeking to distract attention from domestic political troubles launched an expedition against the regency of algiers under the pretext of suppressing piracy and collecting debts what began as a limited military action gradually expanded into a full scale colonial occupation that required decades of brutal warfare to complete the resistance led by figures like emir abd al qadir demonstrated from the beginning that the indigenous population would not accept foreign domination without fierce struggle establishing patterns of guerrilla warfare and harsh repression that would resurface with devastating effect more than a century later the settler society that emerged in algeria during the nineteenth century created a unique colonial situation that differed markedly from other european imperial possessions the colons as the european settlers were known developed their own distinct identity that was neither fully french nor authentically algerian but something new and fiercely protective of its privileged position

it is hard to convey the public impact of france s war to maintain her colonial grip on algeria in the late 1950s this ugly conflict dominated europe s media to almost the same extent as would vietnam ten years later it brought france to the very verge of military coup d etat it destroyed thousands

of careers bitterly divided the french military and political classes for a generation and was characterised by extreme atrocities and war crimes this compact illustrated study details the history organisation equipment and uniforms of the forces involved in the conflict that would lead algeria to independence

the french army s war in algeria has always aroused passions this book does not whitewash the atrocities committed by both sides rather it focuses on the conflict itself a perspective assisted by the french republic s official admission in 1999 that what happened in algeria was indeed a war

this book provides a new analysis of the contested history of one of the most violent wars of decolonisation of the twentieth century the algerian war the algerian revolution between 1954 and 1962 it brings together an engaging account of its origins course and legacies with an incisive examination of how interpretations of the conflict have shifted and why it continues to provoke intense debate locating the war in a century long timeframe stretching from 1914 to the present it multiplies the perspectives from which events can be seen the pronouncements of politicians are explored alongside the testimony of rural women who provided logistical support for guerrillas in the national liberation front the broader context of decolonisation and the cold war is considered alongside the experiences of colonised men serving in the french army unpacking the historiography of the end of a colonial empire the rise of anti colonial nationalism and their post colonial aftermaths it provides an accessible insight into how history is written

this honest man this good man this man who never did wrong to anyone who devoted his life to the public good and who was one of the greatest writers in algeria has been murdered not by accident not by mistake but called by his name and killed with preference so wrote germaine tillon in le monde shortly after mouloud feraoun s assassination by a right wing french terrorist group the organisation armée secrète just three days before the official cease fire ended algeria s eight year battle for independence from france however not even the gunmen of the oas could prevent feraoun s journal from being published journal 1955 1962 appeared posthumously in french in 1962 and remains the single most important account of everyday life in algeria during decolonization
