marine ecosystems are changing at an unprecedented rate in addition to the direct effects of e g warming surface temperatures the environmental changes also cause shifts in plankton communities plankton makes up the base of the marine food web and plays a pivotal role in global biogeochemical cycles any shifts in the plankton community composition could have drastic consequences for marine ecosystem functioning this research topic focuses on causes effects and consequences of such shifts in the plankton community structure

ethicmentality is an innovative book it blends ethics with mentality to capture the interdependence of ethical life and social life creatively the book is also innovative because of the way this interdependence is explored by focusing on practical ethical behavior in today s economy business and society michela betta has advanced an understanding of ethics freed from the burden of moral theory by

introducing a new type of analysis this book also contributes to methodological innovation familiar issues are revisited through the notion of ethicmentality capitalist economy is presented in terms of a mentality embedded in society culture and politics government is revealed as mentality about how to govern economically through market freedom rather than human rights the rise of the financial economy is described as challenging the traditional capitalist mentality of equal opportunities a money mentality around debts and owing is perceived as having replaced credit and owning and the rise of corporation managers as having destroyed the old mentality of ownership ethicmentality shows the potential of constructive critique from economic business and society perspectives it also breaches traditional limits by developing the idea of ethical capital and entrepreneurial ethics ethical thinking is infused with the aristotelian notion of virtues and moderation to reflect about modern work ethicmentality helps us see the complexity of social and personal life given the pervasive nature of mentality and ethics focus on individual deliberation ethicmentality represents their productive combination a new blend for ethical and social analysis

although biodiversity is a relatively new coinage scientists have been studying the subject it describes long before the word's first appearance in the language in the mid 1980s in 1973 for instance the uk systematics association held a symposium on the changing flora and fauna of britain which concluded that not enough attention was being paid to the conservation of rarities a conclusion also reached said the symposium at a meeting of the linnaean society some forty years earlier by 1980 the global 2000 report to the president published by the us council on environmental quality starkly warned of a diminution of up to one fifth of all species by the turn of the century and there is now a growing consensus that the world faces a biodiversity crisis a potentially catastrophic global loss of genetic ecosystem and most obviously species diversity indeed especially since the un convention on biological diversity was promulgated in rio de janeiro in 1992 conserving biodiversity has become the principal focus of the global conservation movement indeed the study of the origins maintenance and protection of diversity has become perhaps the most vibrant offshoot of ecology and conservation studies it is increasingly taught and studied in universities and other research institutions around the world addressing the need for an authoritative reference work to make sense of this rapidly growing subject and its ever more complex and multidisciplinary corpus of scholarly literature

biodiversity and conservation is a new title in the routledge series critical concepts in the environment edited by richard ladle of oxford university s centre for the environment this new major work brings together in five volumes the foundational and the very best cutting edge scholarship to provide a synoptic view of all the key issues and current debates
