mussolini s children uses the lens of state mandated youth culture to analyze the evolution of official racism in fascist italy between 1922 and 1940 educational institutions designed to mold the minds and bodies of italy s children between the ages of five and eleven undertook a mission to rejuvenate the italian race and create a second roman empire this project depended on the twin beliefs that the italian population did indeed constitute a distinct race and that certain aspects of its moral and physical makeup could be influenced during childhood eden k mclean assembles evidence from state policies elementary textbooks pedagogical journals and other educational materials to illustrate the contours of a fascist racial ideology as it evolved over eighteen years her work explains how the most infamous period of fascist racism which began in the summer of 1938 with the publication of the manifesto of race played a critical part in a more general and long term fascist racial program

this exploration of the environmental practices of benito mussolini s fascist regime invites readers to consider the ecological connections of all political projects we might think we see a mountain while it was a war a forest can actually be an engine a monument to workers might reflect the violence of a colonial empire extracted from mussolini s nature in this first environmental history of italian fascism marco armiero roberta biasillo and wilko graf von hardenberg reveal that nature and fascist rhetoric are inextricable mussolini s nature explores fascist political ecologies or rather the practices and narratives through which the regime constructed imaginary and material ecologies functional to its political project the book does not pursue the ghost of a green mussolini by counting how many national parks were created during the regime or how many trees planted instead the reader is trained to recognize fascist political ecology in mussolini s speeches reclaimed landscapes policies of economic self sufficiency propaganda documentaries reforested areas and in the environmental transformation of its colonial holdings the authors conclude with an examination of the role of fascist landscapes in the country s postwar reconstruction mussolini s nature is still visible today through plaques monuments toponomy and the shapes of landscapes this original and surprisingly intimate environmental history is not merely a chronicle of conservation in fascist italy but also an invitation to consider the socioecological connections of all political
