henri lefebvre boredom and everyday life culls together the scattered fragments of henri lefebvre s 1901 1991 unrealized sociology of boredom in assembling these fragments sprinkled through lefebvre s vast oeuvre patrick gamsby constructs the core elements of lefebvre s latent theory of boredom themes of time modernity everyday space urban suburban and mass culture culture industry industry culture are explored throughout the book unveiling a concealed dialectical movement at work with the experience of boredom in analyzing the dialectic of boredom gamsby argues that lefebvre s project of a critique of everyday life is key for making sense of the linkages between boredom and everyday life in the modern world

this work addresses the environmental recognition of autonomous off road vehicles algorithms like deep learning offer impressive performance regarding the classification and segmentation of a scene however context changes scene variabilities or disturbances pose significant challenges to these approaches and cause perception failures a challenge is achieving the universal applicability of perception algorithms usually an algorithm fails in

particular situations due to unconsidered circumstances in the design phase and complexity prevents fully considering all details accordingly this thesis aims to increase the perception s robustness through context and data incorporation furthermore it derives concepts for transferring methods to other robots and scenes a hint that such a task is achievable provides human cognition which is remarkably skillful and adjusts to arbitrary situations biologically motivated perception and cognitive research indicate how an achievable perception design might function leading to guidelines for artificial perception conception the paradigm of behavior based systems suits these criteria due to modularity reactivity and robustness it allows realizing robust and transferable perception and control systems consequently the thesis proposes a novel and reconfigurable behavior based top down and bottom up perception approach quality assessment for data filtering and deviation control is a central aspect resulting in improved perception and data fusion results attentional processing allows for selecting data based on attractiveness task environmental context and history further context assessment of classification results enables reasoning according to the robot s memories and knowledge validation uses five demonstrator vehicles operating in diverse environments and fulfilling distinct tasks here a robust performance was achievable and perception adjusted well to the tested scenes and hardware layouts
