bachelor thesis from the year 2008 in the subject economics finance grade a addis ababa university addis ababa university school of commerce language english abstract insurance business was introduced into ethiopia based on mutual assistances and its modern form traces back to 1905 when bank of abyssinia began to underwrite fire and marine insurance policy as an agent to foreign insurance company the general objective of the study was to analysis the insurance services in the Nile insurance company by giving special attention focusing on life insurance primary data were collected using a structured questionnaire in addition secondary data were extracted from relevant sources to supplement the data obtained from the survey the result of this study reveals that gross written premium and net written premium showed on increasing trend but there is an ups and down of the percentage change because of unhealthy completion between non private and other private insurance companies secondly even if there are new classes of life insurance that was sold in Nile insurance company the structure of life insurance in terms of diversification of the source of revenues is limited to small classes of the business the amount of the premium collected and claims paid in these classes of the insurance is not proportionally distributed the end result of the data also shows that there is a direct correlation between premium collections and the claim payments i.e the classes of life insurance which contributes the large amount of also incur higher claims cost

analysis of earnings in most industries consists of a relatively simple breakdown of revenue and expenses insurance business is more complex the emergence of profit is determined by pricing assumptions reserves and divergences between the

assumptions and actual experience over the lifetime of the business these extra complexities have given rise to a process commonly known as earnings by source this process is designed to explain earnings relative to the underlying sources unfortunately in many companies even if this process is carried out the usefulness of it as a management tool is frequently overlooked the reasons for this are varied ranging from difficulty in explaining results to questions over the validity of the results themselves the formula and methodology described in this book was developed from first principles in order to address these issues and make it beneficial as a management tool
