this book explores why democratization processes in sub saharan africa have made so little progress despite more than two decades of multi party politics on the subcontinent by applying multiple linear regression analyses to a new data set on multi party elections in sub saharan africa the study investigates the relationship between political mobilizations and electoral competitiveness it finds that the more societal groups engage in political mobilizations such as protests and strikes the more competitive elections become based on these results the author argues for a change in the policies of international democracy assistance programs the study s findings suggest that efforts to promote democracy would likely be more successful if international donors focused their support on organizations that have active constituencies and are willing to use their mobilization capacity to address ruling elites with political or socio economic grievances

outstanding academic title for 2007 choice magazine this volume studies elections as a core institution of liberal democracy in the context of newly democratizing countries political scientist staffan i lindberg gathers data from every nationally contested election in africa from 1989 to 2003 covering 232 elections in 44 countries he argues that democratizing nations learn to become democratic through repeated democratic

behavior even if their elections are often flawed refuting a number of established hypotheses lindberg finds no general negative trend in either the frequency or the quality of african elections rather elections in africa based on his findings are more than just the goal of a transition toward democracy or merely a formal procedure the inception of multiparty elections usually initiates liberalization and repeated electoral activities create incentives for political actors fostering the expansion and deepening of democratic values in addition to improving the democratic qualities of political regimes a sequence of elections tends to expand and solidify de facto civil liberties in society drawing on a wealth of data lindberg makes the case that repetitive elections are an important causal factor in the development of democracy he thus extends rustow's 1970 theory that democratic behavior produces democratic values
