look at how this technology aligns with education 4.0 due to the rapid advancements in technology future education systems must prepare students to work with the latest technologies by enabling them to learn virtually in augmented ways in varied platforms by providing an illusion of physical objects which takes the students to a new world of imagination and virtual reality. VR creates virtual and interactive environments for better learning and understanding. AR applications in education are covered in four chapters of this book including a chapter on how gamification can be made use of in the teaching and learning process. The book also covers other application areas of AR and VR. One such application area is the food and beverage industry with case studies on virtual 3D food employee training, product customer interaction, restaurant entertainment, restaurant tours, and product packaging. The application of AR in the healthcare sector, medical education, and related devices and software are examined in the book's final chapter. The book also provides an overview of the game development software Unity, a real-time development platform for 2D and 3D AR and VR, as well as the software tools and techniques used in developing AR-based apps.

Camera trapping in wildlife management and research is a growing global phenomenon. The technology is advancing very quickly, providing unique opportunities for collecting new biological knowledge. In order for fellow camera trap researchers and managers to share their knowledge and experience, the first international camera trapping colloquium in wildlife management and research was held in Sydney, Australia. Camera trapping brings together papers from a selection of the presentations at the colloquium and provides a benchmark of the international developments and uses of camera traps for monitoring wildlife for research and management. Four major themes are presented: case studies demonstrating camera trapping for monitoring, the constraints and pitfalls of camera technologies, design standards and protocols for camera trapping surveys, and the identification, management, and analyses of the myriad images that derive from camera trapping studies. The final chapter provides future directions for research using camera traps. Remarkable photographs are included showing interesting, enlightening, and entertaining images of animals doing their thing.
