this book presents a brief history of economic thought from the 17th century to the present day each chapter examines the key

contributions of a major economist or group of economists and includes suggestions for further reading economists covered include keynes marshall petty and jevons and less familiar theorists such as galiani and turgot

why have the neoliberal economic programs aimed at transforming eastern europe to a market economy and democracy since 1989 not only experienced unanticipated difficulties but more importantly failed to achieve their expected progress dr ladislav rusmich and dr stephen m sachs offer a comprehensive and critical study that examines this specific question and concludes that the cultural and institutional conditions created by communism must be overcome in order to critique previous policies and propose a better direction drawing on the experiences of dr rusmich who for many years was an important participant in the communist economic apparatus and who is also among the leaders attempting to reform it during the prague spring of 1968 this work corrects common misconceptions among mainstream economists about the workings of communist economies lessons from the failure of the communist economic system is a first hand expert account that provides useful economic lessons applicable to the first world concerning such topics as the role of power in the economy monopoly bureaucracy market culture and ethics to name a few

the wiley blackwell companion to economic geography presents students and researchers with a comprehensive overview of the field put together by a prestigious editorial team with contributions from an international cast of prominent scholars offers a fully revised expanded and up to date overview following the successful and highly regarded companion to economic geography published by blackwell a decade earlier providing a comprehensive assessment of the field takes a prospective as well as retrospective look at the field reviewing recent developments recurrent challenges and emerging agendas incorporates diverse perspectives in terms of specialty demography and geography of up and coming scholars going beyond a focus on anglo american research encourages authors and researchers to engage with and contextualize their situated perspectives explores areas of overlap dialogues and potential engagement between economic geography and cognate disciplines

this book aims to study from an approach linked to epistemology and the history of ideas the evolution of economic science and its differing seminal systems today mainstream economics solves certain problems chosen within the scope of normal science without questioning the epistemological foundations that support the paradigm within which they were conceived contrary to a neoclassical interpretation the historicist interpretation shows that from the incommensurability of the different paradigms it is impossible to conceive of a progress of economic science in a long term perspective this book ultimately reveals from the different economic schools of thought

analyzed that there is no pure form of episteme or system of understanding each concrete episteme in the history of economic thought is by nature hybrid in the sense that it contains components from preceding systems of knowledge

providing an in depth novel analysis of education s role in today s economy by scrutinizing its theoretical underpinnings this volume critiques the suitability of the current dominant economic framework for education and for shaping educational policymaking worldwide critically examining the history and philosophy that underpin our present societal understanding of the link between economics and education the book argues for an urgent redefining of education s role in the economy based on intellectual foundations that significantly differ from our current dominant conceptions across seven chapters the book posits that the adoption of a new philosophical framework the reshaping of economic and educational aims and the adjustment of our educational system are each necessary to better promote human flourishing ultimately providing a platform to entirely reconsider the idea that the primary aim of education is to serve the economic system in particular economic growth this book will appeal to scholars researchers and postgraduate students studying educational policy the philosophy of education and the history of education more broadly education policymakers and academics studying education and the economy may also find this book of interest

now available in a fully revised and updated third edition this established textbook provides a penetrating and comprehensive analysis of the historical institutional and theoretical factors that have contributed to china s economic success includes coverage of china s foreign investments trade with regional partners chinese human capital and bureaucratic economic institutions covers a diverse set of important issues including environmental restraints income distribution rural poverty the education system healthcare exchange rate policies monetary policies and financial regulation accessibly written and intelligently organized to offer a straightforward guide to china s economic evolution written by a lauded economist researcher and advisor to government officials in mainland china and taiwan

contains papers that appeal to a broad and global readership in all fields of economics

excerpt from an alphabet of economics the following alphabet grew out of an attempt to compile a glossary of economic and political terms for the use of readers of the new age in general and of students of the system of national guilds in particular it developed however into a more or less systematic attempt to define economics in terms of the wage system and at the same time to suggest an alternative to it though fragmentary therefore in appearance it will be found to contain a consistent criticism of current economic theory a consistent

exposition however inadequate of the economic theory held by the new school of national guildsmen and consistent suggestions somewhat shadowy it is true towards a social reconstruction it has long been realised that modern industry depends for its main motive upon the desire for gain and hence that profit seeking or production for the sake of profit is an accurate description of it it has long also been realised that in thus permitting production to be carried on from an irrelevant motive we were admitting an ethical contradiction into the practices of the state at the same time since economists by means of their analysis of the factors of production found themselves unable to detect any intellectual defect in the system the ethical defect was assumed to be either a passing phenomenon to be remedied by education or inherent in human nature nothing they concluded was wrong in the theory of economics hence nothing could be wrong in the practice unless it were due to factors outside economic control economic theory in short was assumed to be able to leave the court where it had been charged with the crimes of modern industry without a stain upon its character to this however it was not possible that everybody always should agree and in fact as the history of socialist criticism shows there have always been protestants and dissentients who maintain that what is right in theory cannot be wrong in practice and that what is wrong in practice must needs therefore be wrong in theory without attempting in this place to resume the course of such a criticism or to review the successive hypotheses upon which such criticisms have rested themselves it may be said that the common sum of them is to be found and is assumed in the definitions herein contained the issue turns it will be seen upon the original analysis of the factors of production from which if we accept the current conception all the consequences of modern industry flow and which therefore must be re-examined if we are to build our industry upon a new foundation about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

treating the mathematical methods used in the economic dynamics this book shows how they are utilised to build and analyse dynamical models accordingly the focus is on the methods and every new mathematical technique introduced is followed by its application to select economic models the mathematical methods covered range from elementary linear difference and differential equations and simultaneous systems to the qualitative analysis of non linear dynamical systems stability considerations are stressed throughout including many advanced topics bifurcation and chaos theory are also dealt with the reader is guided through a step by step analysis of

each topic be it a mathematical method or an economic model the study edition also provides the reader with solutions to the numerous exercises
