until recently grammars of english have received surprisingly little scholarly attention  
while a lot of research is done on dictionaries it appears however that learners of english  
shy away from modern grammars and prefer to consult dictionaries or traditional  
reference grammars instead this raises questions as to the relationship between  
theoretical linguistics and grammar writing and calls for more research into this area  
especially for the period from 1800 onwards which was crucial for the development of

grammatical thinking and its acceptance or rejection at all educational levels today this volume brings together work from international experts on the historiography of english grammar writing who deal with a variety of topics grouped into three overlapping sections i native grammars of english ii non native grammars of english and iii grammatical analyses the volume includes summaries of the articles and a name index
