programmes counselling psychology review although designed as a text book this introduction to the main schools and methods of psychotherapy is one of the most engaging pieces of psychological theory i have ever encountered i was initially skeptical having found similar books both narrow and hard work conceptually due to the fact i have never studied the fundamentals of psychology and therapy i have often found secondary source material too high level presuming prior knowledge and therefore it was useless to me this book changed that profoundly the chapters on jung and rogers were both lucid and interesting and gave me a keen insight into the fundamentals of their theories and the processes of therapy based upon them however what truly threw me was the excellence of the chapter on gestalt therapy i cannot put into words to how inspirational this section was amazon review richard nelson jones s achievement is to make accessible to the interested reader in one chapter the complexity of jung s metapsychology ann casement jungian psychoanalyst excellent a lively introduction to person centred therapy professor brian thorne director centre for counselling studies university of east anglia a very clear accurate and thorough introduction to person centred therapy professor petruska clarkson physis and university of surrey i find the chapter on rebt to be excellent dr albert ellis president albert ellis institute for rational emotive behaviour therapy new york city clear thorough succinctly summarizes ct s most important concepts and principles dr judith s beck director beck institute for cognitive therapy and research philadelphia this is an authoritative and accessible textbook for use on introductory courses in the theory and practice of counselling and therapy it presents two approaches from each of the three main schools of contemporary therapy practice the psychodynamic school freud s psychoanalysis and jung s analytical therapy the humanistic school person centred and gestalt therapy and the cognitive behavioural school rational emotive behaviour therapy and cognitive therapy in addition the book discusses the structure and functions of theories reviews issues in evaluating therapeutic approaches and contains a glossary

a thought provoking volume and one that brings an expanded perspective some aspects are unsettling some frightening some so distasteful that my reaction is to find another gig should the future be thus but i did find myself rethinking at idle moments and rereading most of the volume the works therein contributed to my own perspective well worth buying american journal of pastoral counseling i was admiring of those chapters which took a wide view this book can be seen as a read out of a number of attitudes within the profession and within

society some are partisan or competitive occupied with the self justification and proselytizing that is likely to lead to in fighting others see the larger task the aware repositioning that needs to happen when the world is moving on this is a book worth reading for the depth and the width of much that is written in it and not just as a hologram of the present state of the profession many contributors give evidence of the self examination the awareness of the environment the largeness of vision and the strictness with self that are prerequisites for humility and learning they look cautiously forward both to what might be reached through the profession s best work and to the reductionist production line future that might be a worst outcome of regulation of confluence and complacent self interest self society many authors discuss some common themes for the future that include increased use of short term problem specific cost efficient forms of therapy all chapters were compelling interesting and readable contemporary psychology from the plethora of counselling books to be found in any reputable bookstore these days this is one i recommend you to buy the ten chapters give us a flavour of differing philosophical approaches to counselling and psychotherapy at the same time they provide a medium where leading exponents in the field can share their experience of practice and give their hunches as to where we may be heading as a profession it makes for a fascinating read it describes exciting developments already underway and gives a critique of where some developments have been less than helpful for anyone training practising tutoring or designing training courses i would recommend this as a thought provoking timely book dialogue a book with many benefits on reading this book the reader is made very aware that the psychotherapeutic professions are embedded in a social and political world illustrations are plenty and exceptionally well chosen for example holmes highlights how historical events such as the world wars or the study of communication systems affected the development of psychotherapeutic systems examples are clear and thoughtfully put british psychological society counselling psychology review the book is enriched by a number of american contributions i would certainly recommend palmer and varma s book as one containing a good cross section of views about what the millennium holds for counselling counselling the journal of the british association for counselling the contributors are an eminent and eclectic line up each chapter focuses in one way or another on professional clinical and philosophical issues and on predictions for the field this is a stimulating collection of views by experienced therapists it is thoughtful often contentious

and avoids rose tinted self satisfaction this book contains well written and important polemical and prophetic material and all trainees and reflective practitioners would benefit from engaging with the diversity of themes presented by the editors arguably none of us involved in the field can practise with integrity unless we are prepared to question the basis purpose and future of our work british journal of guidance counselling an interesting book admirably the authors have completed a difficult task for predicting the future is not easy particularly within counselling and psychotherapy where changes are frequent the ten chapters are well written with insight nurses with limited knowledge of the field will find this an easily accessible book competitively priced and worth the outlay for insights into the possible directions counselling and psychotherapy make take journal of community nursing provides vivid and challenging foresight into the different hypothetical paths counselling and psychotherapy may follow indian journal of social work in this challenging volume leading british and american practitioners discuss different aspects of the future for counselling and psychotherapy as they approach the new millennium and establish themselves as professions in their own right the volume provides a vivid foresight into the different hypothetical paths counselling and psychotherapy may follow covering a range of professional practical and philosophical issues the predictions are realistic although not always optimistic the future of the different and varied counselling approaches is also assessed in terms of which are developing further and how and which are likely to become less popular and why

how hard it is to find a book to recommend to trainees which will give them an insight into what counselling and psychotherapy too for that matter is really like this book does exactly that this is a book which would be equally useful to the humanistic practitioner and the more orthodox one the breadth of sympathy is admirable in dealing with what is common to all orientations this is one of those rare books which does justice both to the human experiences involved in counselling and psychotherapy and to the theory which might explain those experiences changes what is the experience of counselling from the perspectives of both client and counsellor what can be learned for the practice of counselling from an understanding of how it feels to be a client or a counsellor addressing these questions central to this book are the personal accounts of individual clients and counsellors who each relate their own very different experiences of counselling they explore such issues as identity expectations trust power and boundaries in the client counsellor relationship and each

examines the intense personal meanings of success or failure in the client or counsellor role an analysis of the implications for the counselling relationship concludes the volume
