this is a textbook for an intermediate level course in microeconomics that uses calculus throughout most of the competition either uses no calculus or relegates the math to footnotes and appendices the text also focuses on theory rather than empirical data to motivate the analysis the authors include references to real events and firms with no distracting separate boxes

this textbook for master programs in economics offers a comprehensive overview of microeconomics it employs a carefully graded approach where basic game theory concepts are already explained within the simpler decision framework the unavoidable mathematical content is supplied when needed not in an appendix the book covers a lot of ground from decision theory to game theory from bargaining to auction theory from household theory to oligopoly theory and from the theory of general equilibrium to regulation theory additionally cooperative game theory is

introduced this textbook has been recommended and developed for university courses in germany austria and switzerland

the second edition has been fully updated and reworked including an additional chapter on game theory with its comprehensive coverage the book combines the theoretical rigour of an intermediate microeconomic text with extensive applications of the key principles to evidence and data drawn from the uk europe and other international sources

this textbook takes the modern equilibrium or marketing clearing approach to analyze and explain macroeconomic activity it uses true case histories to build a macroeconomic model that is consistent with microeconomic theory and provides a basis for applying the theories to international topics
