this book brings together the surviving texts of the 113 talks on art and architecture that we know of given by the art historian sir nikolaus pevsner on radio and television between 1945 1977 it includes the seven texts of the 1955 reith lectures in their original broadcast form as well as lectures that pevsner gave in german for the bbc in london and rias in berlin and on the radio in new zealand these talks are important as an example of the attempt by the bbc in particular to provide intellectual programming for the mass population the talks are

important for what they reveal about changing tastes in the treatment of the arts as a broadcast topic as well as offering a case study of the development of one particular historian's approach to a subject that was gaining ground in universities as a direct result of his popularisation of it they show what topics were thought to be central to the artistic agenda in the mid years of the last century whether from an academic or journalistic perspective and reveal the mode and manner of academic engagement with the public over the period forty six of these talks were published in 2002 on the centenary of pevsner's birth in a trade edition at the time his reputation as an active force in architectural thinking had long been eclipsed and interest in him had waned since then there has been a turn around in tastes and pevsner's role within his chosen field is now being actively studied and discussed by a new generation for whom he is central to an understanding of the 20th century there is therefore a real need for this book in addition to containing twice the number of talks as the previous volume it is supplemented with explanatory introductions footnotes and citations it also reveals as far as this is possible alternative versions of pevsner's texts as they appeared at different stages in the original production process as such this edition can be relied on by academics as scholarly and

the book shines light on the problem of judgment particularly in the realm of architectural technics and the codes that regulate it the struggle to define sustainability and thus judge architecture through such lenses is but one dimension of the contemporary problem of judgment by providing the reader with an inherently interdisciplinary study of a particular discipline architecture it brings to the topic lenses that challenge the too frequently unexamined assumptions of the discipline by situating architecture within a broader cultural field and using case studies to dissect the issues discussed the book emphasizes that it is not simply a matter of designing better more efficient or more stringent codes to guide place making but a matter of reconstructing the boundaries of the systems to be coded the authors are winners of the edra place

questo libro raccoglie alcune analisi su aspetti dell'eredità di Colin Rowe e del gruppo creativo che si è formato attorno a lui a partire dagli anni sessanta del secolo scorso che possono essere di grande utilità per affrontare e risolvere alcune delle difficoltà dell'urbanistica odierna come il collo di una clessidra Rowe e la sua cerchia sembrano essere stati in grado di accumulare, selezionare e utilizzare come riferimento un groviglio generoso eppure complesso e contraddittorio di idee, concetti, metodi e modelli variamente disponibili in un mondo di dinamiche culturali per contribuire alle esigenze della progettazione e in particolare della progettazione urbana creando un sistema di diverse conoscenze di combinazioni e di logiche contestualismo e liberalismo sono due degli approcci caratterizzanti supportati dalle teorie di Rowe che potrebbero rivelarsi più utili nello stato attuale della progettazione urbana doi 10.13134/979.12.5977.501.6
