by the time it was over eight of the crew and nine rescuers were dead and scores more had been put in harm s way the

disappearance and search for the airship Italia was headline news all over the world for months after its last radio message on 25 May 1928 it had reported being to the north east of its base at Kings Bay on the Arctic island of Spitsbergen returning from a long flight to Greenland and the North Pole ships aircraft and men from many countries converged on Kings Bay to participate in the rescue effort the Italian airship designer and pilot Umberto Nobile had flown to the North Pole and beyond in 1926 he resolved to return to the Arctic with a new airship in 1928 the expedition had geographical and scientific aims but the political environment was also an important motivator Benito Mussolini and his fascist party had come to power in 1922 and a successful expedition to the Arctic would be excellent propaganda

originally published by the Goodyear Tire and Rubber Co as a promotional the story of the airship chronicles the history and development of these great silver cruisers of the sky filled with photos and authoritative text the book springs from an era when dirigibles balloons and blimps competed against airplanes for public attention

here is the story of airships—manmade flying machines without wings—from their earliest beginnings to the modern era of blimps in postcards and advertisements the sleek silver cigar shaped airships or dirigibles were the embodiment of futuristic visions of air travel they immediately captivated the imaginations of people worldwide but in less than fifty years dirigible—became a byword for doomed futurism an Icarian figure of industrial hubris dirigible dreams looks back on this bygone era when the future of exploration commercial travel and warfare largely involved the prospect of wingless flight in dirigible dreams c Michael Hiam celebrates the legendary figures of this promising technology in the late nineteenth and early twentieth centuries—the pioneering aviator Alberto Santos Dumont the doomed polar explorers S. A. Andr   and Walter Wellman and the great Prussian inventor and promoter Count Ferdinand von Zeppelin among other—pivotal figures—and recounts fascinating stories of exploration transatlantic journeys and floating armadas that rained death during World War I while there were triumphs such as the polar flight of the Norge most of these tales are of disaster and woe culminating in perhaps the most famous disaster of all time the crash of the Hindenburg this story of daring men and their flying machines dreamers and adventurers who pushed modern technology to—and often beyond—its limitations is an

informative and exciting mix of history technology awe inspiring exploits and warfare that will captivate readers with its depiction of a lost golden age of air travel readable and authoritative enlivened by colorful characters and nail biting drama *dirigible dreams* will appeal to a new generation of general readers and scholars interested in the origins of modern aviation
